I.FAQ

1. TV doesn't display with HDMI collected.
Please check whether the set TV box starts or not.
Please contact the seller for after service if the TV doesn't display after you carry out the above two steps.
2. Be stuck in boot screen
Please pull up the power plug, and then insert the plug again. If it is not effective, please upgrade as the course or contact the seller.
3. The image has a black border or is beyond the TV screen.
TV show a black border when you playing the internet video resource, please adjust it according to the size of your TV as the steps "setting"—"Display"—"Adjust"
4. Wire network is not connected to the router
Please make sure you open the DHCP service of the router.
Please check whether the network cable is well connected and whether network light is on or not.
Please reset to the factory defaults, and try to collect again.
5. WiFi can't be connected to the router
Please make sure you open the router's HDCP service and the

signal intensity is above level three.

Please reset to factory defaults and try again if it still fails to connect to WiFi.

Please try WEP,WPA2-PSK and so on.

Please check whether the input password is correct or not.

6.Network video play is not smooth and is stuck.

This is related to network and server. It is recommended to use more than 2 MB exclusive network. When you watch online video please don't use computer to download or play other online videos at the same time; when you watch the live video, you can use the application key of the remote control to switch to a better video resource.

You can experience the smooth watching by using the application key of the remote control to switch the definition or access point. You can also use other video software to play.

7. Some online films can't play

Some video resources cannot play because of the updating of APK software of system. Please update the software or choose other video software to play.

FCC Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement: ☐ ☐ ☐ ☐

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body. ☐ ☐
