

Freed.Y Single Charger

KWS-210 Single Wireless Charger

Komatech

Description

Operation

- Connect the Dual Charger to the Power Adapter.
- Plug the power adapter into an electrical outlet.
- Place your wireless charging enabled phone onto the Dual Charger.

You may need the Power Patch or a wireless charging case to activate your phone's wireless charging. More details on <http://www.myfreedy.com>

Wireless charging uses the magnetic induction technology. Make sure that your device is properly positioned on the Dual Charger as in the picture (A) below. In other cases as (B), wireless charging will not be activated.

Stand-by	In Charging	Full Charge
Off	Red	Green

※ Sometimes, the LEDs do not turn into Green even though the device is fully charged. It may occur depends on what the device you use. In this case, it is not a malfunction.

The Global Standards
of Wireless Charging

Qi (pronounced "chee") is the global standard for wireless charging. Qi is backed by over 200 industry-leading companies of the WPC (Wireless Power Consortium). Freedy Dual charger is certified by Qi standard.

- **FCC Part 15.105 statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

- **FCC Part 15.21 statement**

Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

- **FCC Part 15.19 statement**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- **RF Exposure information**

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum 20 cm between the radiator and your body. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter unless authorized to do so by the FCC.
