MT-RX Receiver Label Material:

The following was copied directly from the Brother Website and describes the P-Touch TZ-355 Tapes which are used for the MT-RX FCC /serial number label.

'The TZ-355 white on black p-touch tape sticks to virtually any surface and is durable enough to withstand scrapes and abrasions. Because it's water resistant, it can be used outdoors, as well as indoors. Laminated TZ tapes shrug off spills of any kind; from water, to oil, to chemicals and won't fade under harsh UV rays. And it stays on through hot and cold environments from freezers to microwaves. We have laminated tapes down to a science.'
