RE: Confidentiality Request regarding application for FCC ID: 2ACGBSOL3915

To Whom It May Concern:

Please be advised that G4S Monitoring Technologies Ltd request that the following information is to be held permanently confidential (Long-Term Confidentiality) on behalf of G4S Monitoring Technologies Ltd.

- Operational Description
- Antenna Details
- Block diagrams
- Schematics and PCB layouts
- Parts List
- Internal Photographs

G4S Monitoring Technologies Ltd have spent substantial effort in developing this product, in particular some of the tamper features are not available in competitor products. Having the information easily available to competitors would negate any advantage they have achieved by developing these features.

The application contains technical information which *G4S Monitoring Technologies* deems to be trade secrets and propriety. If made public, the information might be used to the disadvantage of the applicant in the market place.

The product is a sealed device (welded in production) and a non-consumer device serviceable only by the grantee.

G4S Monitoring Technologies Ltd request “Internal Photographs” to be held permanent confidential per FCC KDB 726920, II. Long-Term Confidentiality Section 3. The reason is because SOLO3 device is sealed and water proofed when it is used and internal components are not accessible to users.

Thank you for your attention to this matter.

Yours faithfully,
G4S Monitoring Technologies Ltd

Kelvin Wong
Senior RF and Electronics Engineer
