Safety Precautions

Please read the following concise rules carefully. Nonobservance to the rules may lead to danger or violence of the laws. The user's manual gives details about the safety precautions.

	Secure startup Please don't start up the MID in case it is forbidden to use wireless equipment or the usage thereof may result in any interference or danger.
	Put traffic safety first Please abide by all the local laws and regulations. Drive the automobile with both hands. Put the traffic safety first at drive.
	Interference Any wireless equipment may be subject to interference, affecting its performance.
	Power-off in hospital Please comply with any related restrictions. Turn the mobile off when you are close to medical equipments.
	Power-off on the plane Please comply with any related restrictions. Usage of wireless equipment may result in interference to the plane.

	Power-off when refueling Please don't use the equipment in gas stations. Don't use the equipment in the periphery of fuel or chemicals.
	Power-off in the periphery of blasting spots Please comply with any related restrictions. Don't use the equipment near the place of blasting.
	Proper employment Use the equipment only in proper locations as described in the product document. If not necessary, please don't touch the antenna point.
	Employ proper maintenance service Only qualified maintenance personnel are allowed to install or repair the equipment.
	Accessories and battery Approved accessories and battery are to be used. Please don't connect with unmatched products.
	Waterproofing quality The equipment is not waterproof/ Please keep it dry.
	Backup Back up or keep written records of important information stored in the equipment.

	Connecting with other devices Please read the user's manual of the device for detailed safety information when connecting the equipment with other devices. Don't connect with unmatched products.
	Emergency call Make sure the equipment is in the covered area of the network service and the calling function is activated. As per the specific requirements, press the key of finish to clear the screen and return to the standby state. Input the emergency call number and press the call key. Tell the called your location. Don't hang up before the called tells you to.

■ About your MID

Please abide by the laws and regulations and respect the local customs as well as others' privacies and legal rights and interests (including the copyrights) when using different functions of the mobile.

Turn on the mobile in order to use its functions (except for the alarm clock).

In case usage of the wireless equipment may result in any interference or danger, please don't power on.

■ Network service

You should apply to the wireless service provider for opening of necessary services in order to use the phone function of the equipment. Many

functions of the equipment require support of special network functions. The functions may not apply to all networks. As for other networks, you may have to reach necessary agreements with the wireless service provider before using the network services. Your service provider will provide necessary descriptions and interpret the charging standard to you. Certain restrictions may be formulated by some networks, which will affect the mode that you use the network service. For example, in certain networks, not all the characters and services in relation to language are supported.

Your service provider may require forbidding to use or turning off part of the functions. Then these functions will not be shown in the equipment function list. Your equipment may also be provided with some special configurations, such as name of the function list, sequence of the function list and change of icons. For more information, please refer to your service provider.

Overview

■ Function Description

The MID newly launched by our company is a portable slide Tablet, and supports functions including dual cards and single -standby, single T-flash card, gravity acceleration sensor, FM, Third analog TV and etc.

It makes your work more convenient and your free time more fun with the combination of its hand written function and keyboard, florid colored screen, music-driven running light, pleasant bells, cartoon head portrait for incoming calls, strong file management function (supporting T-FLASH card), fashionable camera function and long time tape recording function, music player, video player, supporting MMS.

■ Password

Phone password

With the phone password, you can prevent others from using your MID without your approval. The original phone password is 1122. Refer to "Security Setting" for how to change the password and how to set the mobile to show request for inputting the phone code.

PIN

PIN (personal identification number) and UPIN (unique personal identification number) (4-8 digit) help you to prevent others to use you SIM

card without your approval.

PUK

Input the 8 digit PUK (personal unlocking key) to change the locked PIN and UPIN. Input PUK2 (of 8 digit) to change the locked PIN2. If the keys are not provided together with the SIM card, please inquire the local service provider.

Restriction code

You have to input the restriction code (of 4 digit) to use the operator determined barring function. Note that the function requires support by SIM card.

1. Introduction

■ Insert the SIM card and the battery

Ensure to turn off the equipment and disconnect with the charger before taking out the battery.

Ask your SIM card dealer whether he has provided SIM card service and the method of usage who may be service provider or other dealers.

SIM card and its contacts are vulnerable to scratch or bending. Attention shall be attached when use, insert or take out the card.

NO PICTURE

■ Insert Memory Card

Only use approved and compatible T-FLASH card applicable to the mobile

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference, and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits For a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference In a residential installation. This equipment generates, uses and can radiate Radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.--Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate(SAR) information:

This MID meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure information and statement the SAR limit of USA(FCC) is 1.6W/kg averaged over one gram of tissue. Device types:ROAD XT-71BG (FCC ID: 2ACI7-ROADXT-71BG)has also been testd against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.347W/Kg and when properly worn on the body is 0.701W/kg.

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be located or operating in conjunction with any other antenna or transmitter. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
