

1. Download ChromaBright APP

Download “Chroma Bright” App from Apple Store and Google Play Store, or scan the QR code.

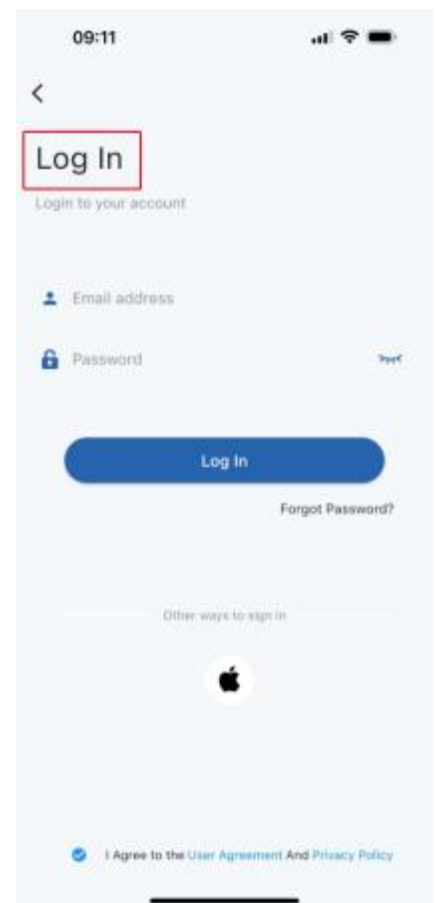

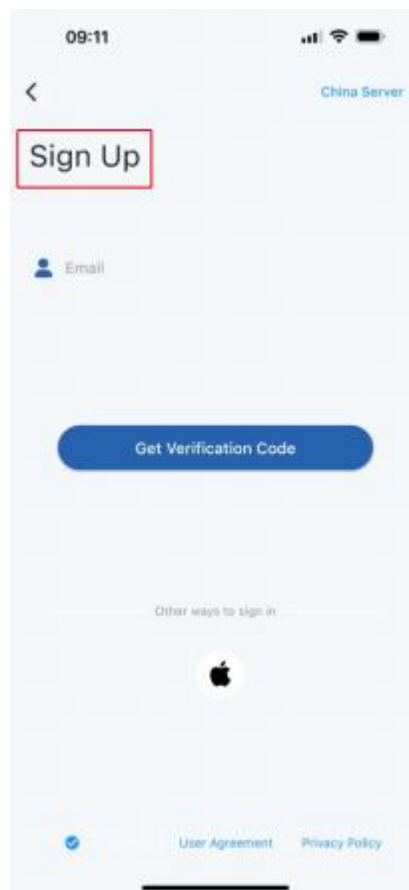

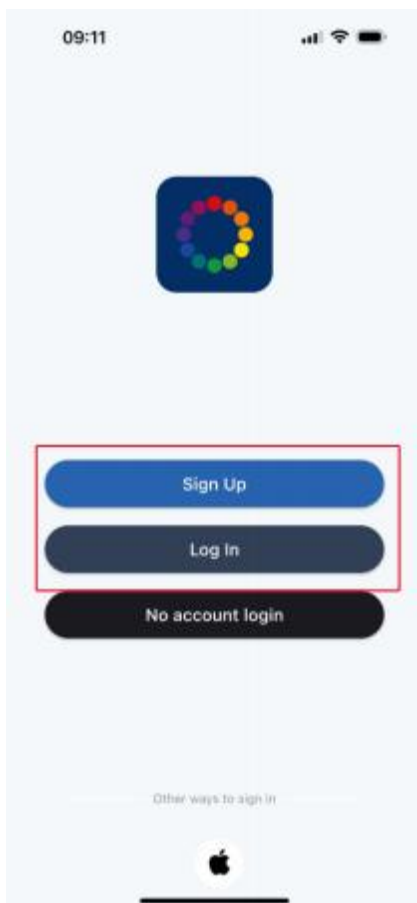

Chroma Bright

Chroma Bright APP

2.1. How do I connect to the ChromaBright APP

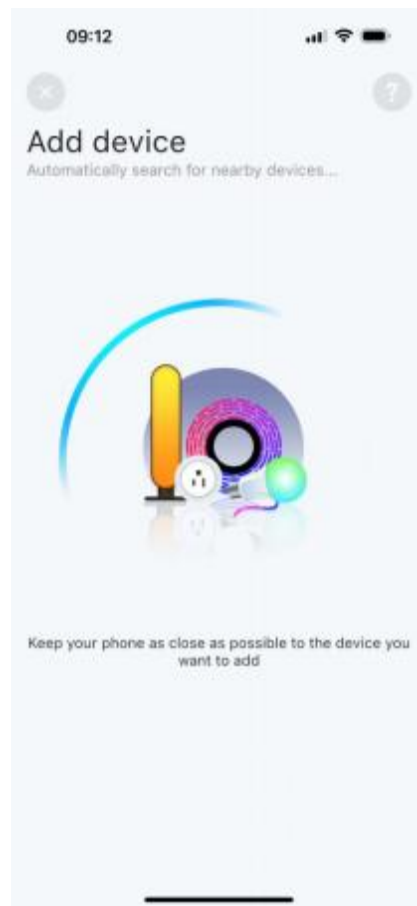

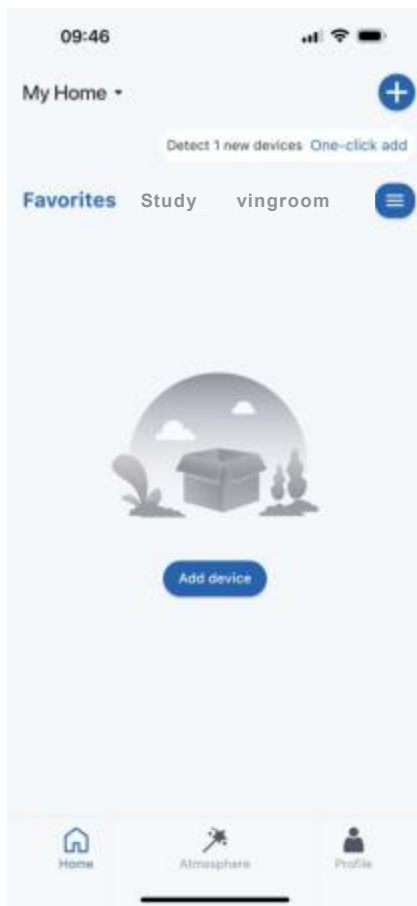

1) Register/Login your “Chroma Bright” account.

2) You can log in as a visitor

3) Open your phone Bluetooth , turn on the device

4) Enter "Chroma Bright" app, tap "Add Device" or click "+" to add the device

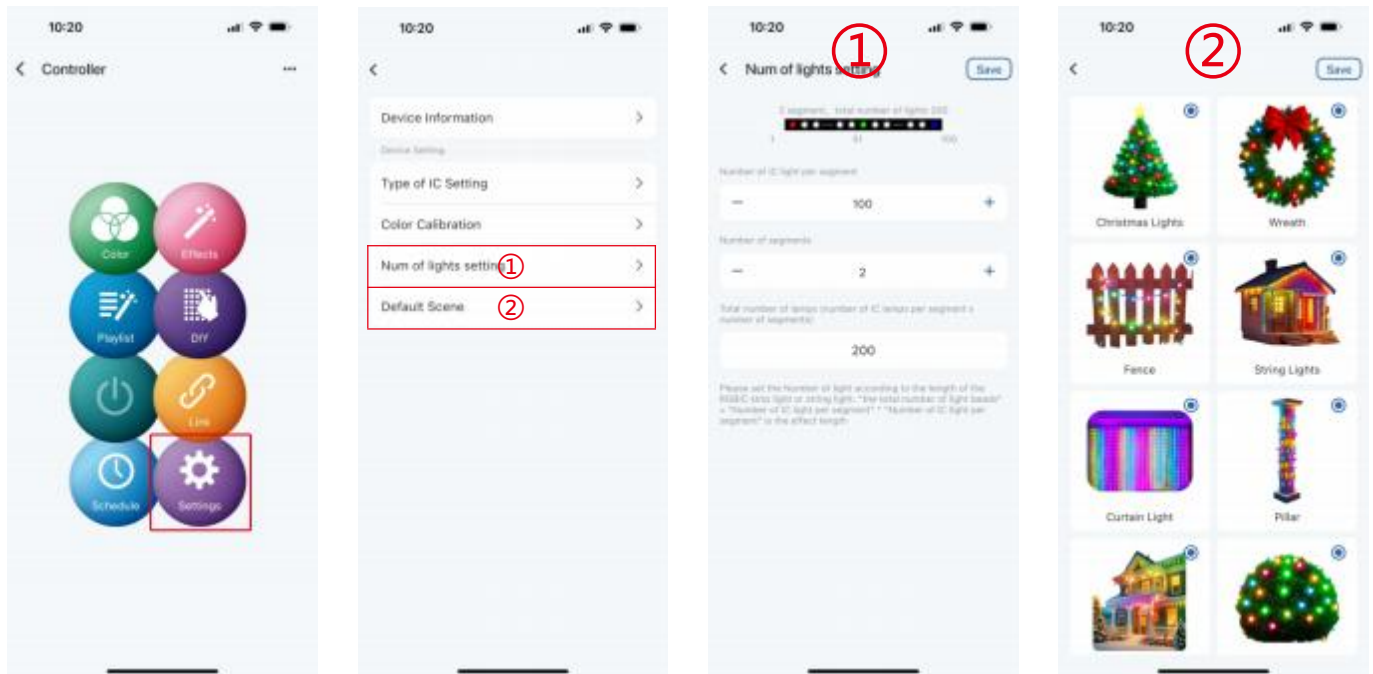

5)Rename the device and select a room for it.

3.About setting

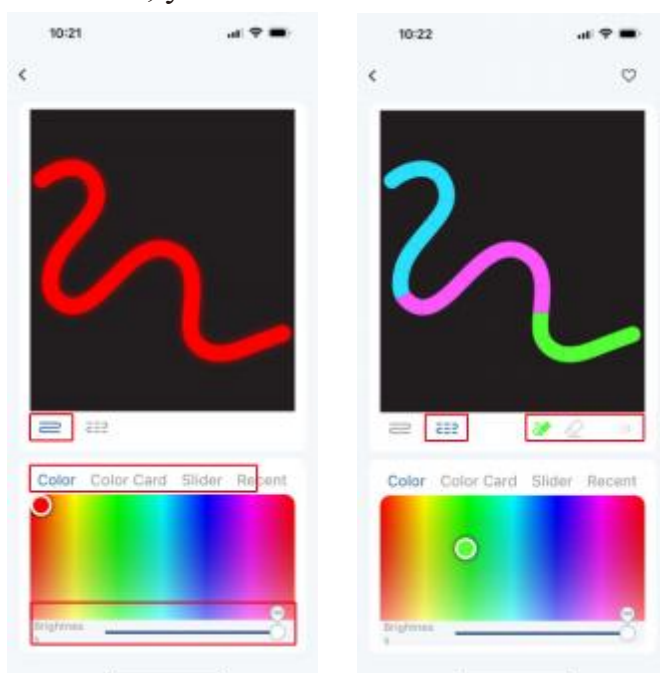

Click the "Setting" icon to enter the setting interface, which can set the chip type, color calibration and number of lights for the controlled device (the number of lights in each segment should not be greater than 500, and the total number of points should not be greater than 2048), and the setting of ic points should be applied to the smudge function. And according to the control lighting scene type selection

4.APP features in detail:

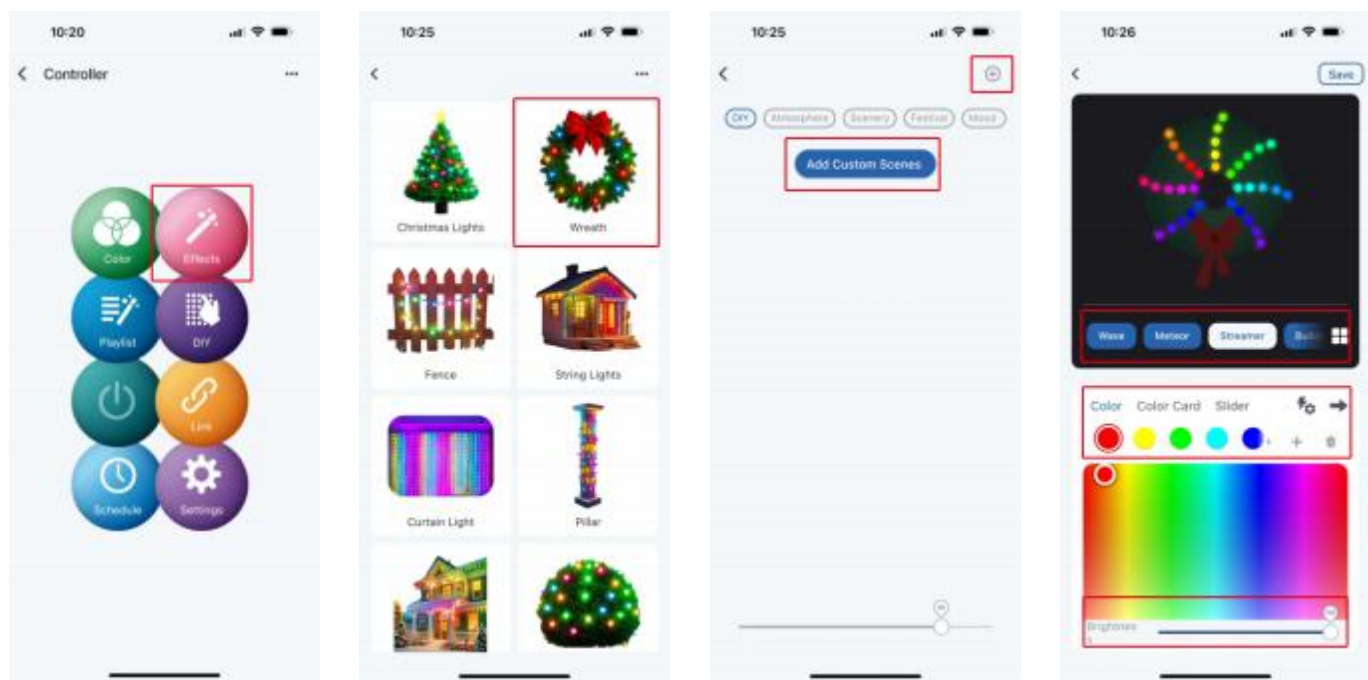

1).Colorful function

Light color adjustment is divided into whole sections and segments, providing different columns for color selection or editing, and can adjust the brightness. In the segmentation interface, you can smear or erase the color of the segmentation and set the gradient effect.

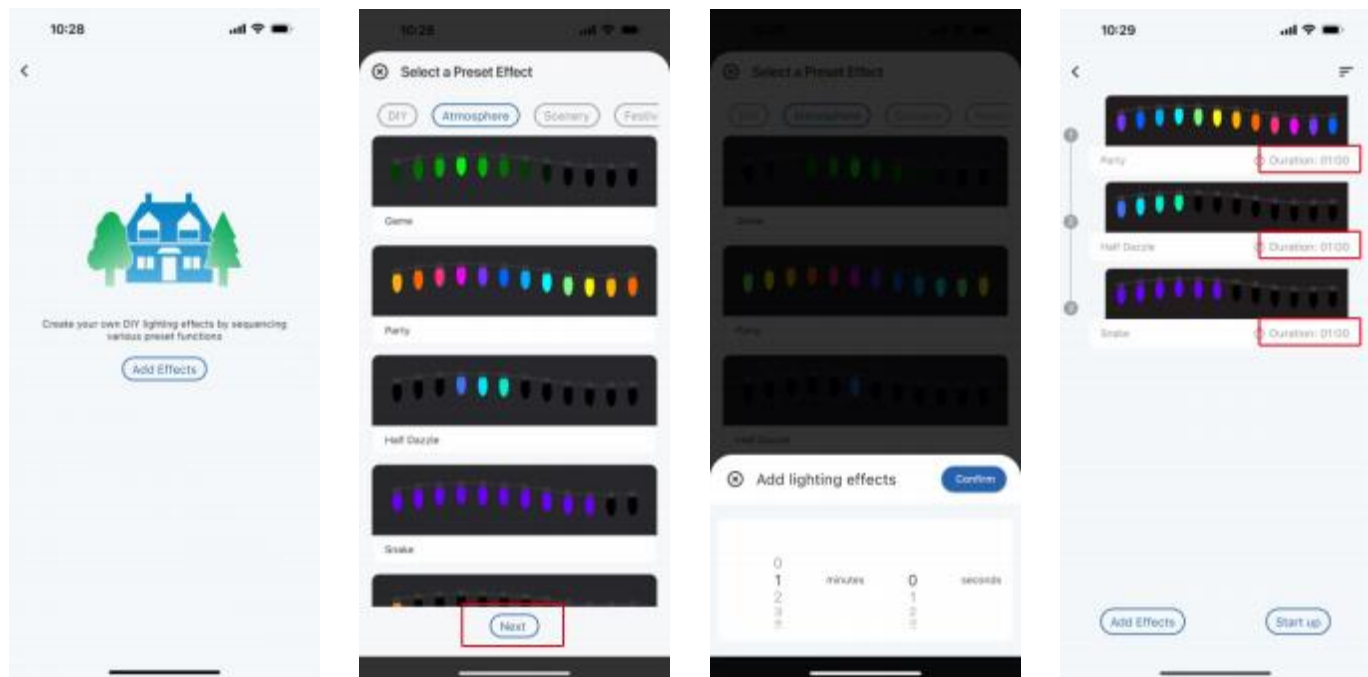

2) .Effect function

Built-in atmosphere, landscape, festival, mood, life five categories of scene mode light effect selection, and click "DIY" or "Favorites" to add custom scenes.

3) .Carousel function

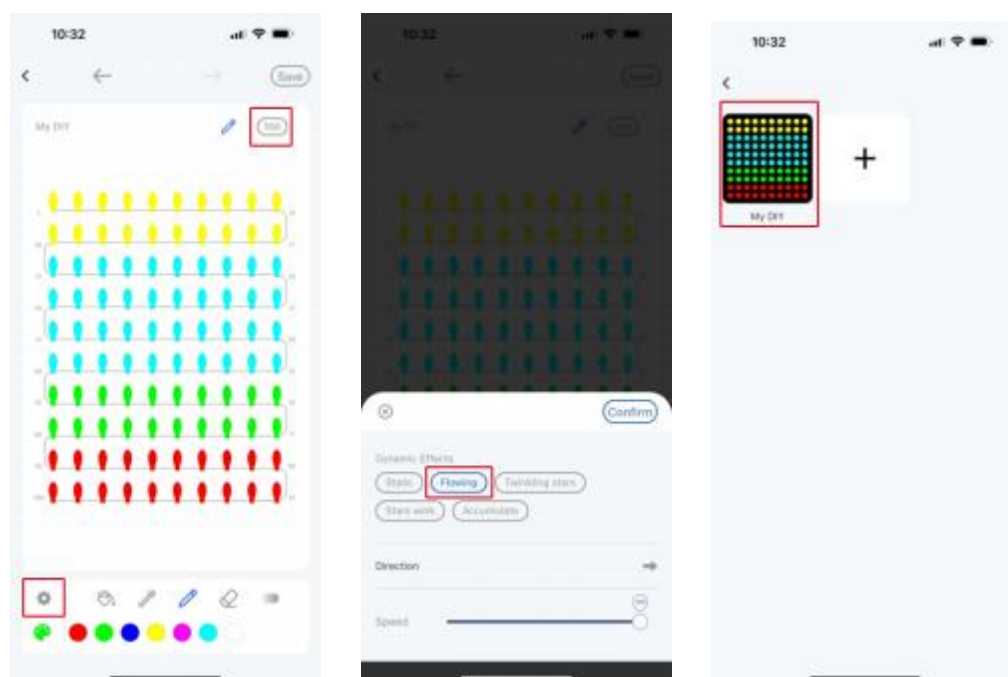

Select the lighting effects for different types of scene modes and set the lighting effects duration. Combine different lighting effects to play sequentially. Long press to drag the sequence.

4).DIY function

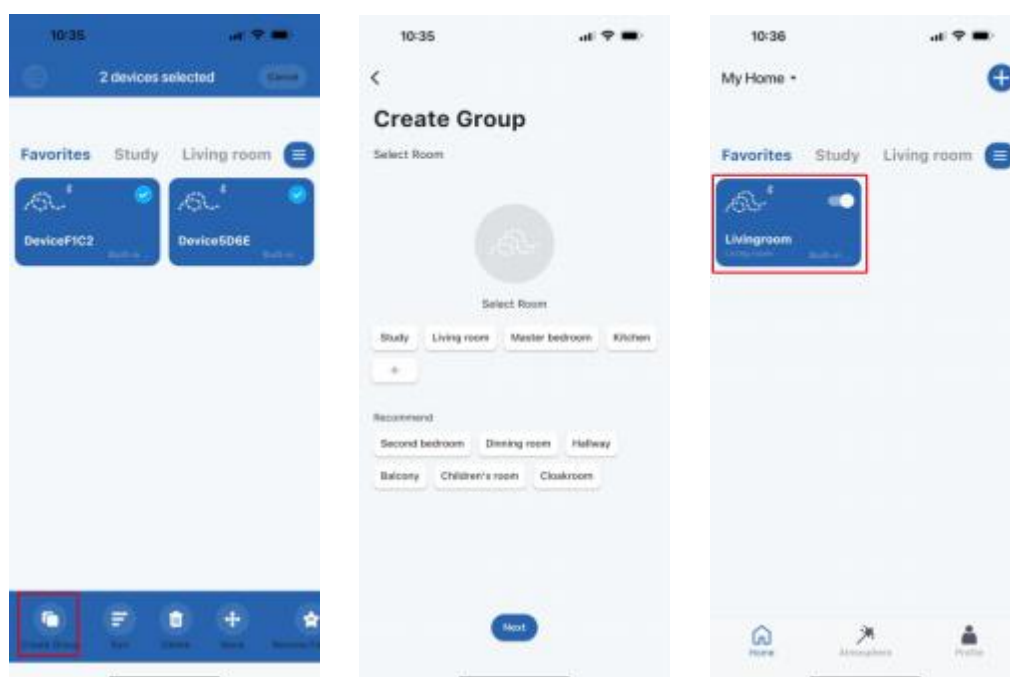

Click the plus sign to customize the light color and dynamic effect, and click Save after setting.

(Make sure that the number of lights is consistent with the equipment before DIY, otherwise the lighting effect is incomplete, please edit the number of ic lights in the "Setting" function)

5).Group control function

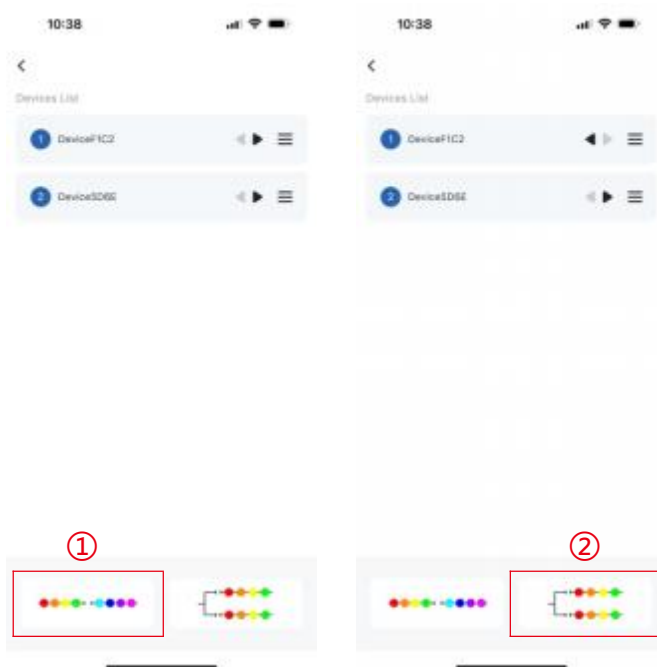

Multiple controllers can be classified into the same group, and the devices in the group can be controlled by one-key dimming, color tuning, switching and other functions at the same time.

6). Linkage function

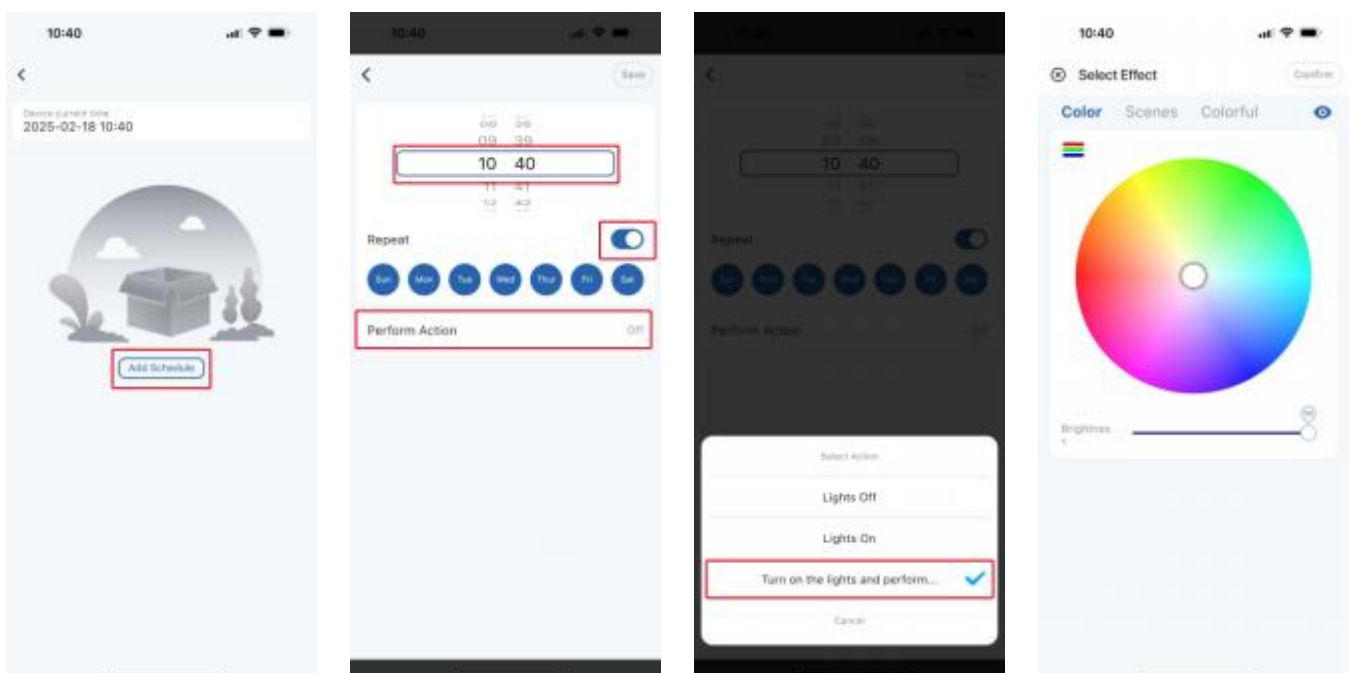

By grouping the lights into the same group, multiple lights can be linked to experience the APP function. Long press and drag the lighting sequence in the device list to change the lighting direction.

- ① Series: lighting sequence linkage in the group
- ② Parallel: the lighting in the group is synchronized

7). Timing function

- a). According to the time you set, switch the lighting under its control.
- b). When turning on the light, you can freely choose different lighting effects in colorful or scene.

Matters needing attention

- 1) Please use the product in a dry environment;
- 2) The input voltage should be the DC voltage within the specified range. Do not use 220V AC power directly.
- 3) The product is anode connection mode do not connect wrong, wrong connection is easy to lead to product failure.
