

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device. On the left is a green printed circuit board (PCB) populated with various electronic components, including a large silver integrated circuit (likely a microcontroller or processor) and several smaller chips. To the right of the PCB is a yellow rectangular battery with a white label that includes technical specifications. The components are positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the components, providing a scale for the photograph.
Solder Board-Component View 1	 A close-up photograph of the green PCB from the previous view, focusing on the solder joints and components. The board is populated with various electronic components, including a large silver integrated circuit, several smaller chips, and numerous surface-mount components. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, providing a scale for the photograph.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The component is rectangular with a complex layout of electronic components, including a large silver-colored integrated circuit (IC) in the center, various smaller ICs, and numerous surface-mount components. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). The component's dimensions are approximately 100 mm by 60 mm.
Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. This component is similar in shape and layout to the one in View 2, but it features a different arrangement of components, particularly in the central area where a large silver-colored IC is present. It is also placed on a blue textured surface next to a black ruler with white markings. The component's dimensions are approximately 100 mm by 60 mm.

Solder Board-Component View 4	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a large square chip with a grid of pins and several smaller components. The board is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the board's dimensions are approximately 100mm by 100mm.
Solder Board-Component View 5	 A photograph showing a small, square electronic component, likely a microchip, placed on a blue textured surface. The component is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler indicates the component's dimensions are approximately 10mm by 10mm.
