Request for Transmitter Modular Approval

Model: NJR4265RF3
FCC ID: 2ACUJR4265

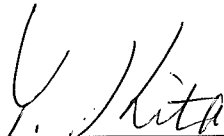

The modular transmitter complies with the following requirements in FCC Part 15 Section 15.212 for Modular Approval:

Transmitter Module Characteristics:

		Requirement	Comment
1.	Yes	The radio element of the modular transmitter must have its own shielding.	Shielding is provided by a metal cover.
2.	Yes	The modular transmitter must have buffered modulation/data inputs (if such inputs are provided).	Due to a nature of the module, any buffer function is not necessary.
3.	Yes	The modular transmitter must have its own power supply regulation.	Power supply regulation is achieved by one regulator IC.
4.	Yes	The modular transmitter must comply with the antenna requirements of FCC 15.203 and 15.204(c).	Antenna requirements are achieved by an integrated patch antenna structure.
5.	Yes	The modular transmitter must be tested in a stand-alone configuration, i.e. the module must not be inside another device during testing.	This modular transmitter was tested in a stand-alone configuration. For more details, refer to the submitted test report.
6.	Yes	The modular transmitter must be labeled with its own FCC ID. If the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module.	This modular transmitter is labeled with its own FCC ID. As it is not visible when the module is installed into a host device, a label of the host device will bear the wording "Contains FCC ID: 2ACUJR4265" with one line.

7.	Yes	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	This modular transmitter is compliant with all applicable FCC rules. Detailed instructions are given in the submitted user manual.
8.	Yes	The modular transmitter must comply with any applicable RF exposure requirements.	The modular transmitter complies with RF exposure requirements. Refer to the RF exposure statement for details.
