

Product Specification

1. Current consumption: 1.35mA av.
2. Amount of constant test time: 220 hours.
3. Work Environment: temperature: between 5°C and 40 °C. Humidity: <70%
4. Moisture content range: 20%-60%
5. Error: <1%
6. Size: 27mm*22mm*63mm
7. Working together with Application: MeiJia

Product Function

As a small-size and stylish-design one, our product is convenient to use and carry. Basing on the technology of detecting Biological impedance, accompanied with data mining technology in our App “MeiJia”, our product manages to test out moisture content of human's skin and then give out deep analysis.

The whole test process takes about 5 seconds, whose result then will be sent to Smart Phone through Bluetooth Low Energy and shown in our App. Besides, according to the real-time value of your skin moisture content and your personal body message, we will provide the accurate and exclusive skin care advice.

Instructions

- 1st.take away the cap.
- 2nd.Press the button on the bottom of product. Then the blinking green led means the device is waiting for connection.
- 3rd.Run the MeiJia APP on your mobile phone, led will turn constant green if connection is successful.
- 4th.Chose one position of your body in App, then put the sonde of product on the position correctly(the sonde must be pressed wholly), the test will begin automatically.
- 5th.While testing, led will turn constant blue, do not move away the sonde until test finishes when the led will turn back constant green.
- 6th.Redo step 4&5 if you want to retest.
- 7th.Press the button on the bottom of product again to turn it off.
- 8th.Wipe the sonde with alcohol drenched cloth and replace the cap.
- 9th.For an accurate result, please wipe the test position cleanly, in case of the sweat and other materials affect the result.

Common questions

1. This device complies with Part 15 of the FCC Rules.Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide

reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.
