

Assembly bottom

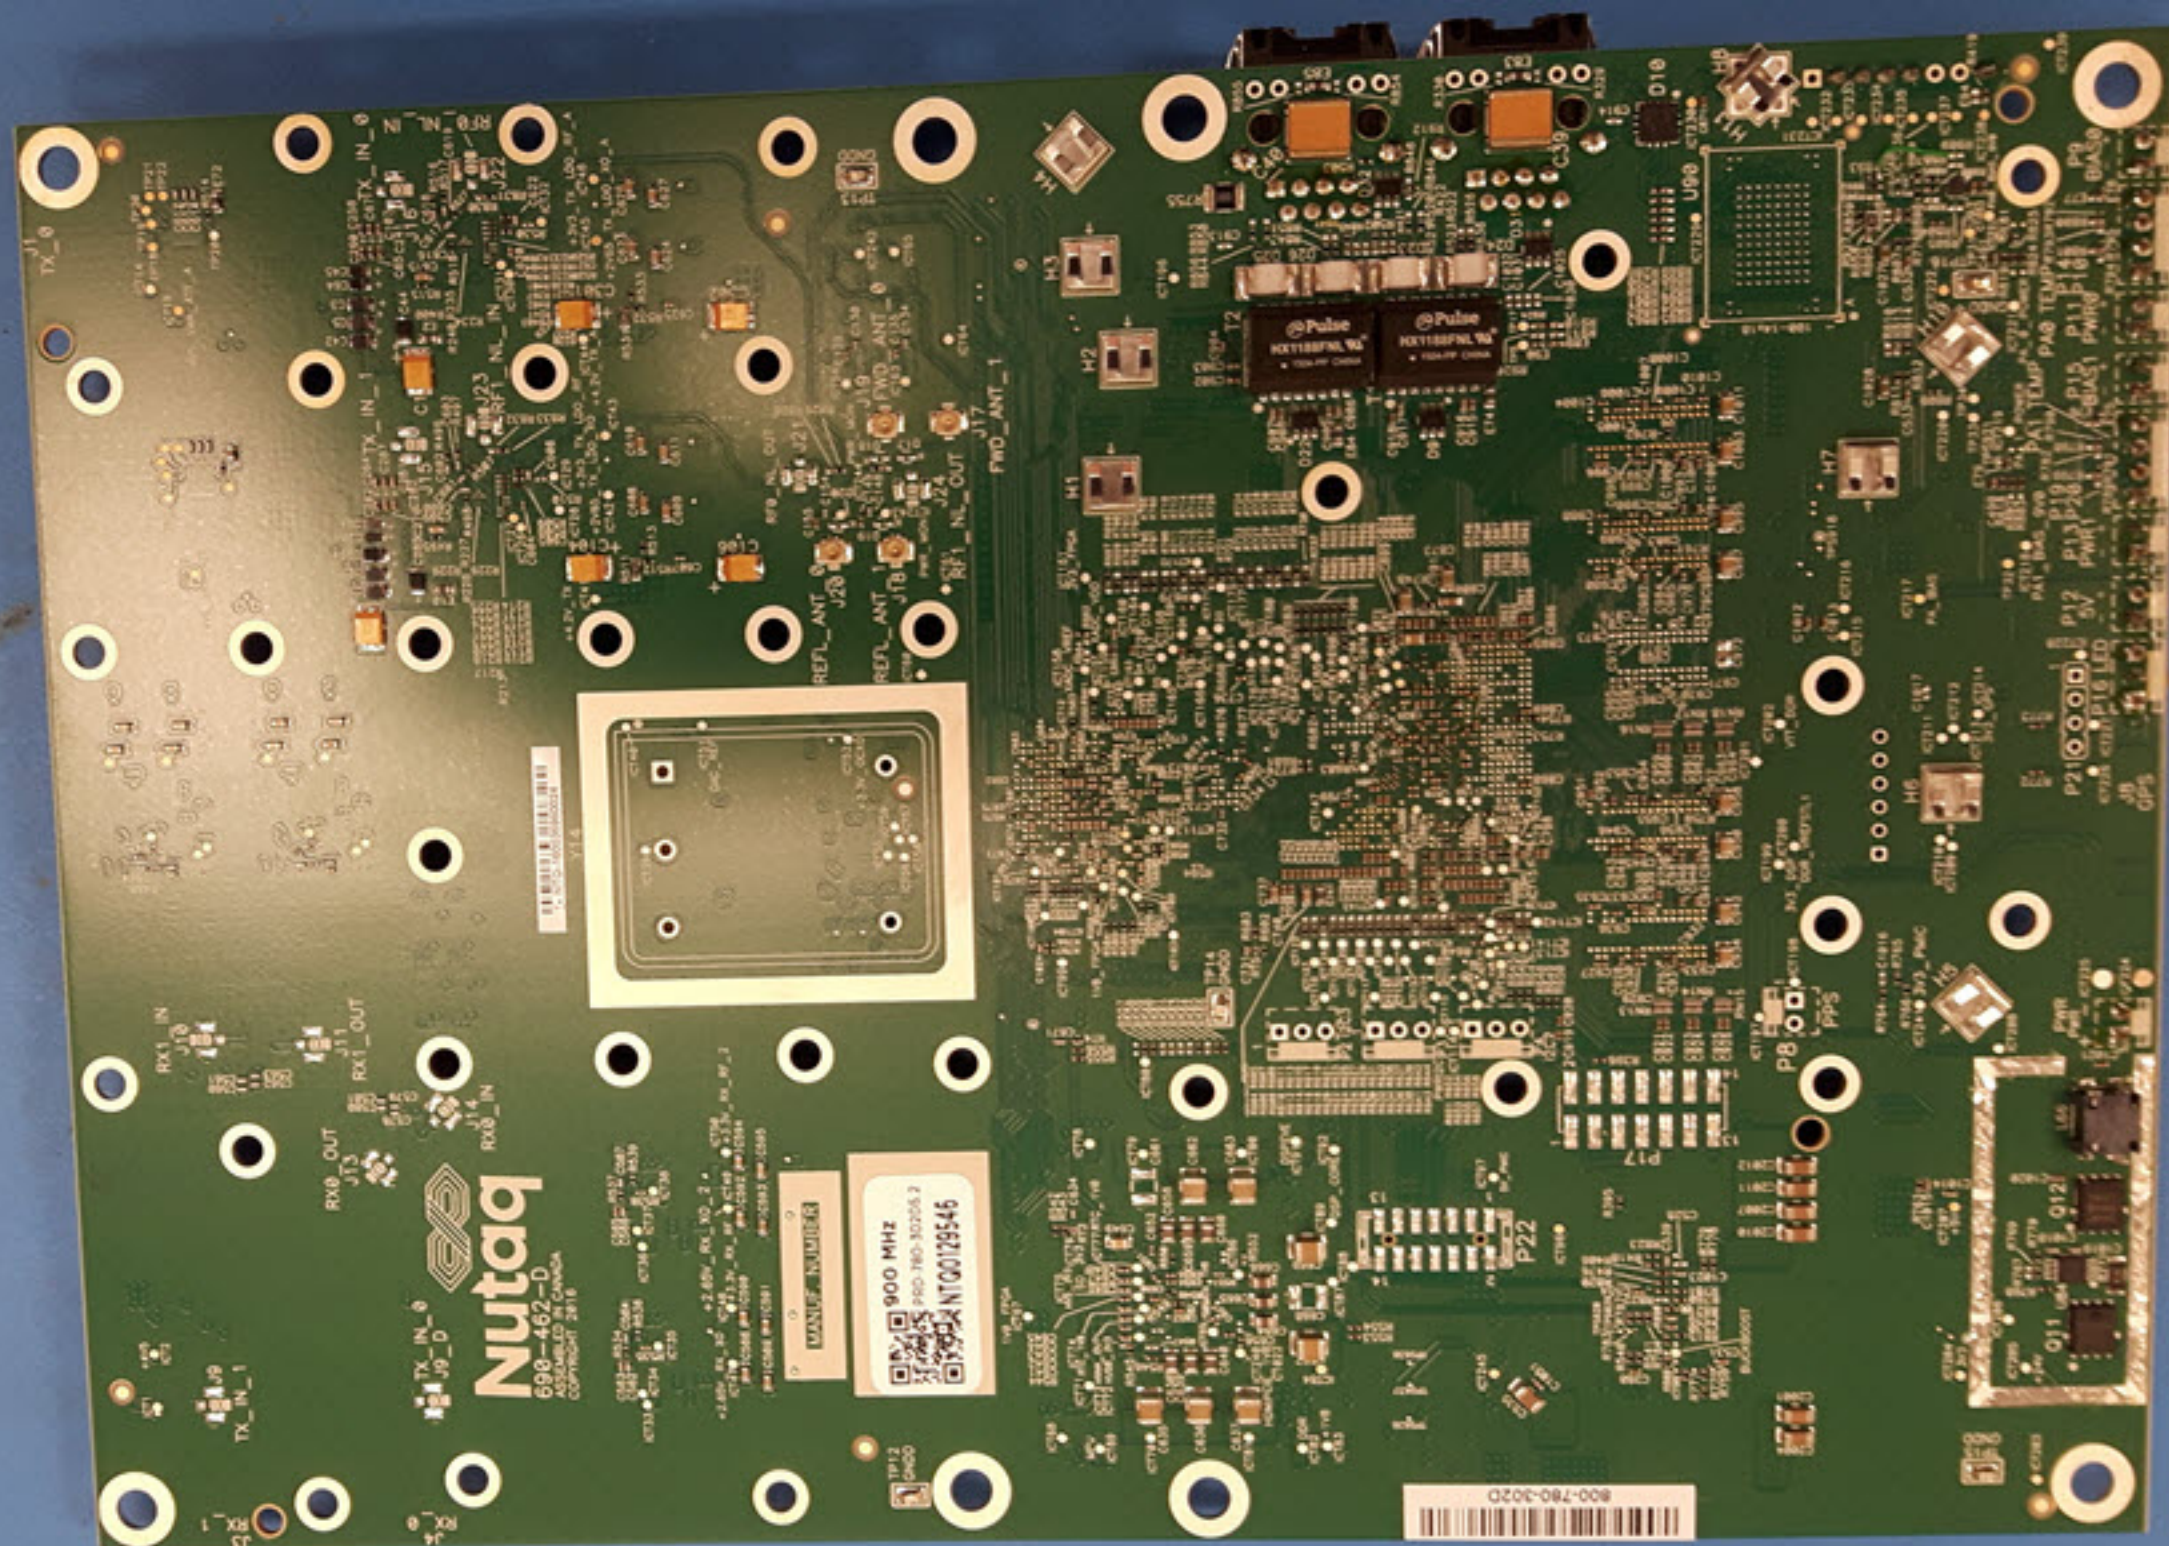

Main board with shields

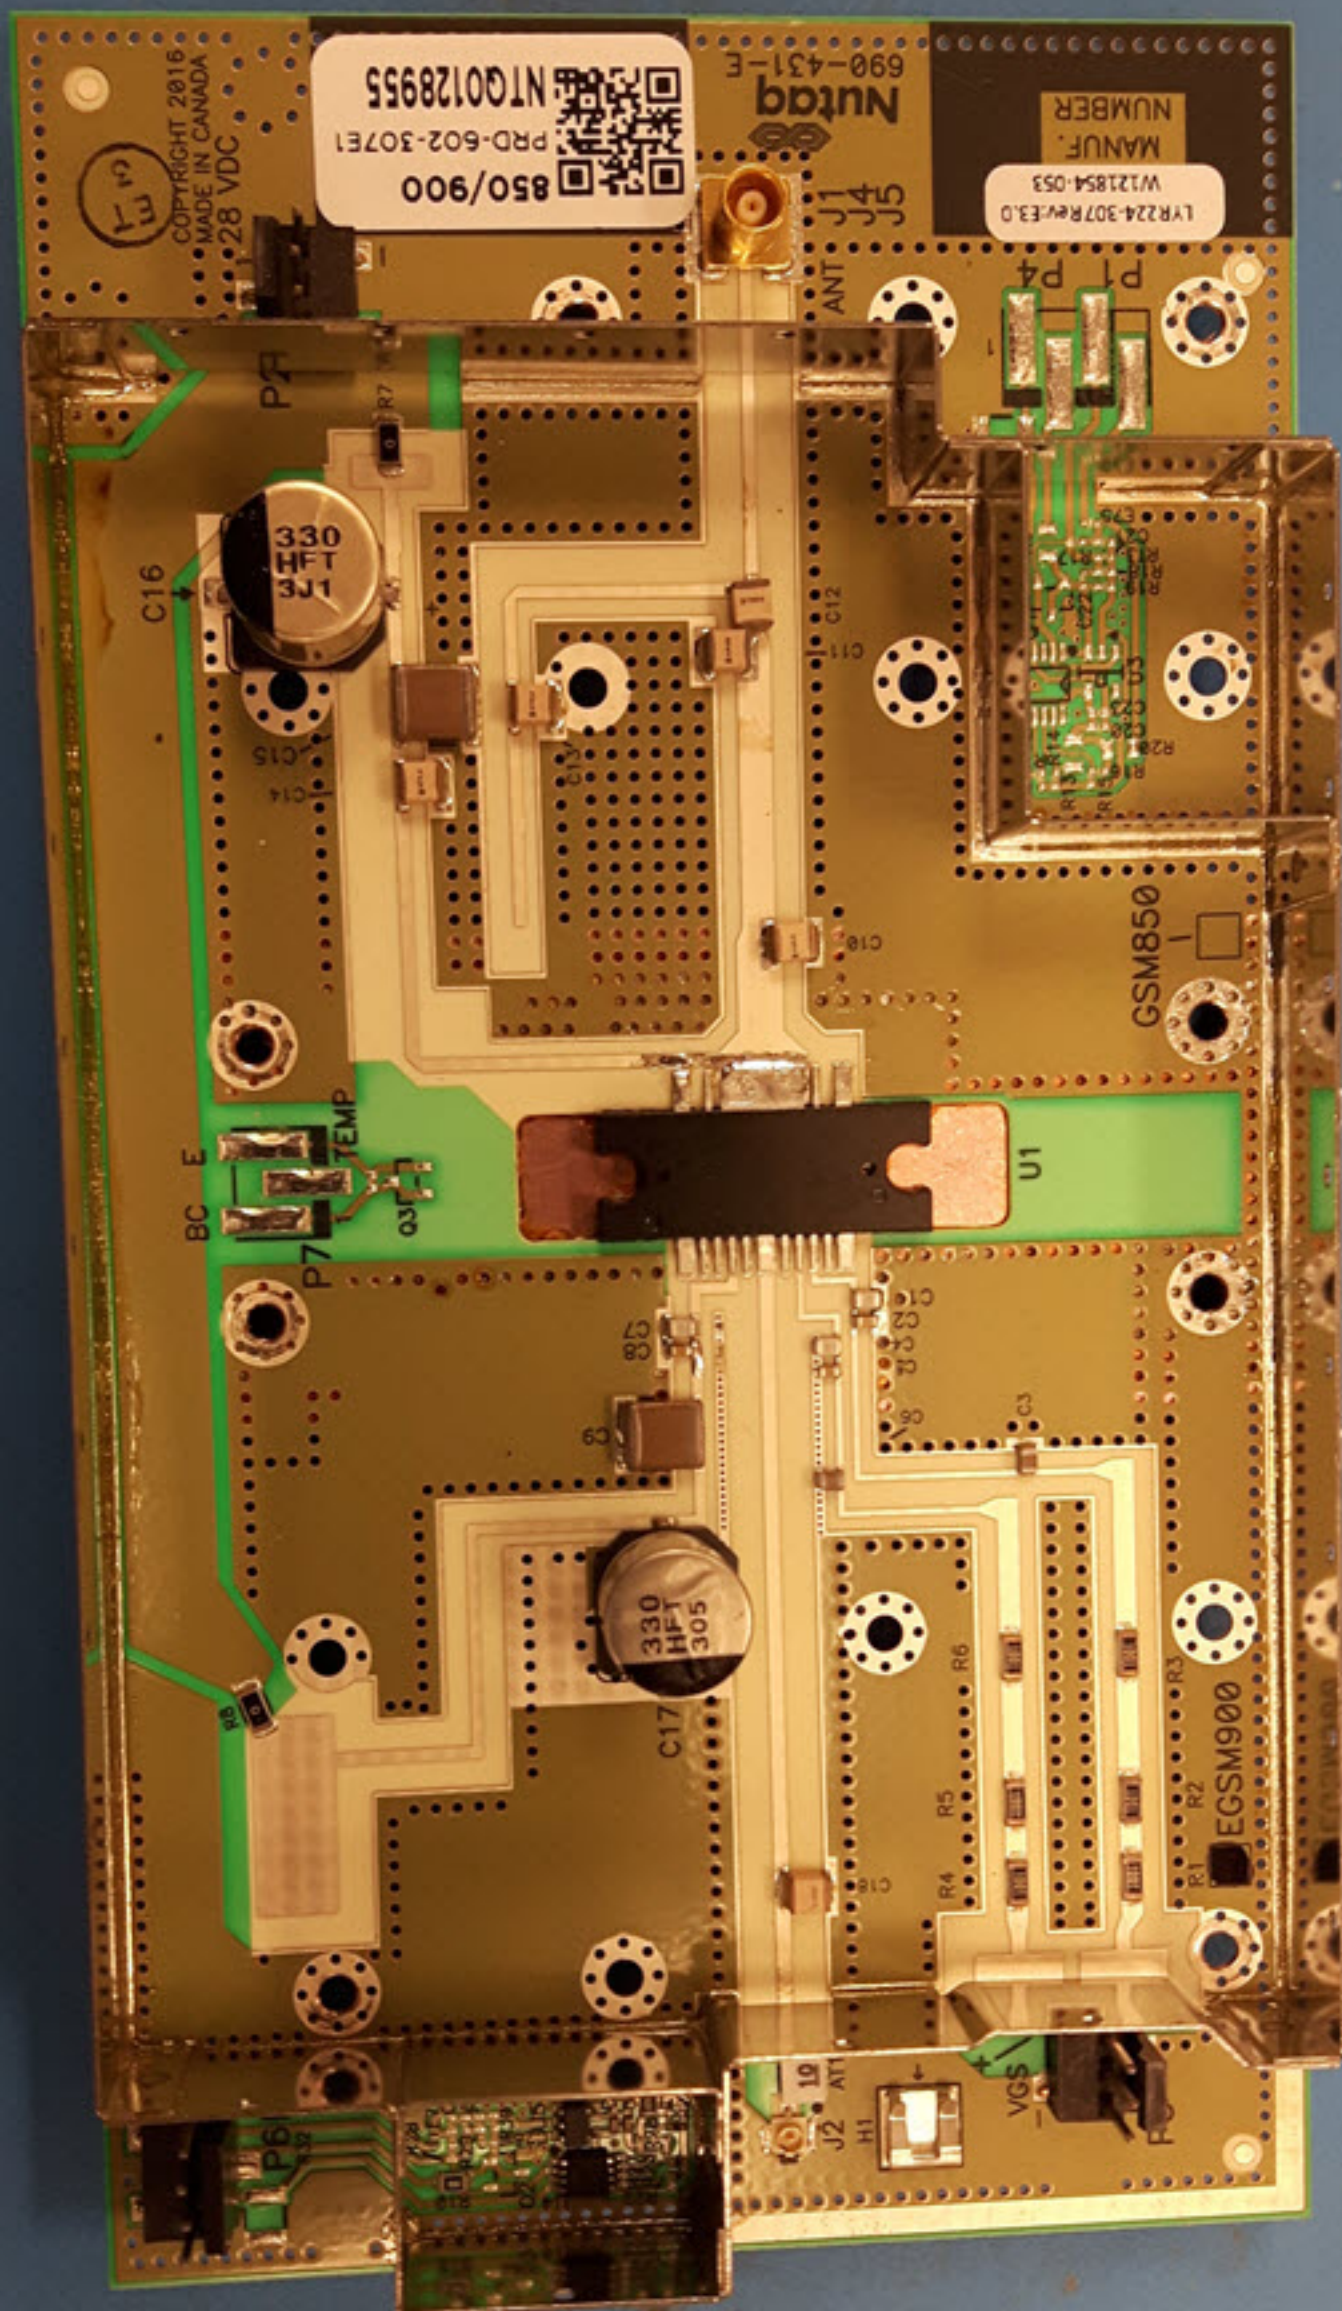

The image shows a rectangular main board, likely for a Raspberry Pi, covered by a large, shiny, silver-colored metal shield. The shield has a brushed metal texture and covers most of the board's surface. At the bottom edge, the board's components are visible, including two USB-A ports, a micro-USB port, and a micro-HDMI port. The board is resting on a light-colored wooden surface.
