

2.1 CH MULTIMEDIA SPEAKER SYSTEM

IM210-BLK-BIG

Quick Start Guide

Item # IM210

1. Make sure the following items are included in your package.

2. For best results, you should place your subwoofer directly on the floor. Typically, you would want one speaker placed directly to the left of a TV or computer monitor, and the other speaker placed directly to the right (see below).

3. Next, you can proceed to connect your speakers to the subwoofer. To do so, insert the cable attached to the speaker which you have placed to your left into the left output jack on the rear of your subwoofer. Insert the cable attached to the speaker which you have placed to your right into the right output jack on the rear of your subwoofer.

4. Once your speakers are connected properly, you can insert the power cable on your subwoofer into an available power outlet in your home.

5. After you plug in your speakers, the LED indicator light will briefly turn red, then start flashing green. The green flashing light indicates that your speakers are in pairing mode, and are ready to pair with a Bluetooth device.

6. You can proceed to pair a Bluetooth device to your speakers (see step 7), or you can also use the included Aux Cable to connect audio devices through the AUX In jack on your subwoofer. The LED indicator light on your subwoofer turns red when an audio device is plugged in to the AUX in jack on your subwoofer.

7. Pairing The Bluetooth 2.1 Soundsystem with a Bluetooth Device

When you first plug the power cable on your subwoofer into a suitable power outlet your speakers will power on. The LED indicator light on the subwoofer will soon turn green and start flashing rapidly to indicate that you are in pairing mode and are ready to pair your speakers wirelessly with a Bluetooth device. Make sure that you do not have the included Aux cable connected to your subwoofer, or you will not be able to enter pairing mode.

Go to the Bluetooth Manager of your Bluetooth device. Search Bluetooth devices and select "BT Speaker" to start connecting.

Once you have successfully paired your speakers with a Bluetooth audio source, the LED indicator light on your subwoofer will stop flashing rapidly, and begin shining steadily while remaining green. In addition, your speakers will emit an audible tone to confirm that pairing was successful.

Important Safety Precautions

1. For best results, place your speakers on a solid, flat surface when in use.
2. Do not touch the metallic portions of your connector cables.
3. When unplugging your speakers from an AC power outlet, do not tug on the AC power cable, instead, pull carefully on the rubberized portion of the plug.
4. In order to avoid potential electric shock or other such accidents, do not dismantle or take apart your speakers or their components.
5. Keep the volume tuned to the lowest setting before powering your speakers on. Once powered, proceed to raise the volume to a reasonable level.
6. Do not expose your speakers to excessive amounts of heat or cold. Keep them in a well ventilated area to prevent any possible overheating.
7. Do not spill liquids or fluids on your speakers. Make sure they stay dry at all times.
8. When connecting an audio device to your speakers, make sure the volume on the audio device is not set too high in order to avoid an excessive signal input.
