Setup Description:

Step 1: Fix the DUT on the pole in the center of the anechoic chamber.

Step 2: The whole antenna unit is connected with the coaxial line at the transmitter end of the Anechoic chamber.

Step 3: Close the anechoic chamber door to avoid the external signal interference.

Step 4: Open the antenna measurement system and can select frequency or angle to test, and Import the need frequency point to test.

Step 5: After testing, the test system can carry on far-field data conversion.
