

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing a small electronic component, likely a microcontroller or sensor, mounted on a printed circuit board (PCB). The component is positioned near a corner where two rulers intersect. The vertical ruler on the left is marked from 0 to 80, and the horizontal ruler at the bottom is marked from 0 to 100. The component is located approximately at the 10mm mark on the vertical ruler and the 20mm mark on the horizontal ruler. The PCB is light blue, and the component is a small, dark, rectangular chip with some gold-colored contacts.
Solder Board-Component View 1	 A photograph showing the same electronic component as in the first image, but from a different perspective, focusing on the solder joints. The component is mounted on the PCB, and the solder joints are visible. The rulers are also present, with the vertical ruler on the left marked from 0 to 60 and the horizontal ruler at the bottom marked from 0 to 80. The component is located approximately at the 10mm mark on the vertical ruler and the 20mm mark on the horizontal ruler. The PCB is light blue, and the component is a small, dark, rectangular chip with some gold-colored contacts.

Solder Board-Component View 2	 A photograph showing a small, square, black component with gold-colored pins, mounted on a blue PCB. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters and centimeters. The component is located at approximately 10 mm on the horizontal axis and 10 mm on the vertical axis.
Antenna View	BT Antenna  A photograph showing the same component from a different angle, highlighting the antenna structure. A red line points from the label "BT Antenna" to the antenna structure. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters and centimeters. The component is located at approximately 10 mm on the horizontal axis and 10 mm on the vertical axis.
