Condition	Showing the gauge of pictogram by average of sleep/stress/recover

Description

- Touch on Pictogram(Condition)
- Able to check user's status and history with graphs for 4 items

Step

Sleep

Calorie

Heart Rate

Smart Advice

- Providing advice on the condition when current status is lower than target

Insufficient sleep

Lack of exercise

Extreme Mode

Providing various data including heart rate for specific exercise

Walking

Exercise Efficiency thru. Heart rate

- Cardio Training Zone
- Fat Burning Zone
- Warm Up / Cool Down

Running

Hiking

Exercise Efficiency thru. Heart rate

- Cardio Training Zone
- Fat Burning Zone
- Warm Up / Cool Down

Biking

Exercise Efficiency thru. Heart rate

- Cardio Training Zone
- Fat Burning Zone
- Warm Up / Cool Down

Measure Mode

Measuring body temp., altitude, heart rate and etc

Heart rate

Altitude

Body Temp.

Part 15.19 statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Part 15.21 statement Changes or modifications not expressly approved by the manufacturer (or party responsible) for compliance could void the user's authority to operate the equipment.

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference or television reception, which can be determined by powering the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
