Flying Environment

Please fly in the spacious indoor, and make sure there is no obstacles, animals or humans nearby.

Please make sure that the appropriate environment should be suitable before flying. When flying, don't allow the quad copter beyond your sight. The children should be under the guidance of adults when flying.

Attention for Controlling:

-Scope of control: The flying scope of the quad copter is about 25m and if beyond the scope, it would be out of control.
Warning: If flying in strong wind, the quad copter may go beyond the control scope and the quad copter would be out of control.
Flight time: The quad copter can fly within the scope under the condition of full charge and micro wind. Please recharge it when found out the flight time is less than one minute.

Please refer to the manual to ensure the correct flight operation.

Battery Installation and Charging Ways

Battery Installation

Battery Charging

Connect the quad copter with the USB charging line, and then insert the USB charging line into the USB port of the computer or any other USB chargers. When the USB indicator is ON, that represents it is under charging. When the indicator is OFF, that represents it is fully charged. Besides Apple charger, this USB charging wire can be connected with any other chargers of Smart mobile or movable power or being charged on the USB interface on the car. The voltage of the USB interface is +5V0.5V.

Operation and Control

Attention: Please avoid losing control. You should bear in mind that you need to operate the control stick slowly when operating the quad copter. During the process of controlling, the quad copter may lose some power. Therefore, during the courses of flying practice, you need to add some extra power to keep this quad copter flying in a certain height.
