Page 5

Network and Connections

NETWORK:

GSM 850, 900, 1800 and 1900

When using inWatch Z, please abide by and respect local laws, local customs, privacy and legitimate rights of others (including copyright).

You may not be allowed to copy, modify or send copyrighted images, music and other content.

inWatch Z can store a lot of useful information; we recommend regularly backing up all your data.

Please read the device's user manual for detailed safety instructions before connecting your inWatch Z to any other device.

Please do not connect incompatible products.

Multi-Touch Screen [ENGLISH IMAGE HERE]

Tap any icon to open the application. You can drag up or down to scroll and you can also drag the screen left or right.

Page 6

SIM Card

inWatch Z supports a micro SIM card.

Micro SIM card lets you save data for communication, such as your personal information: PIN code, contacts, messages, etc.

INSERT A SIM CARD

1. Turn off your inWatch Z.
2. Locate a very small SIM card hole at the left side of the watch (the opposite side of the power button).
3. Push the SIM-eject tool into the small hole until it pops out.
4. Pull the SIM card tray out gently.
5. Place your Micro SIM card in the tray with the golden circuit side facing down.
6. Push the SIM card tray gently back into the slot until you hear it "click" into place.
7. Now turn your inWatch Z on. All of the information on the card will now be in your inWatch Z.

Warning:

Please don't twist or scratch the SIM card, and keep it away from static electricity, dust and water.

Please keep the SIM card and tray away from the children.

When putting on your inWatch Z, please align the clasp, push from behind slightly then press down.

[ENGLISH IMAGE HERE]

ADJUST THE WRIST BAND

After adjusting the size of the wristband, the position of the clasp will be different.

You need to adjust the steel pinto find the most comfortable wrist band size for you.

[ENGLISH IMAGE HERE]

How to charge inWatch Z

inWatch Z uses external conductive contacts to charge.

Open the charger clip and align it to the contacts under the wristband, close the clip and connect the USB cable for charging.

[ENGLISH IMAGE HERE]

Battery of inWatch Z

inWatch Z features a built-in 580 mAh battery, the performance of which could be influenced by many factors such as network configuration, signal strength, temperature, user settings, and mobile phone accessories used besides voice, data or other application modes.

In order to achieve the best battery performance, please follow the following guidelines:

- It takes a longer time to charge a new battery or one that has been unused for a prolonged period of time.
- When charging, keep the battery at or near ambient temperature.
- As with all rechargeable batteries, after long-term use it will take a longer period of time to charge due to gradual capacity loss. Please note that this is a normal phenomenon.
- If battery is unused for some time, or when battery power is low, a certain interval of time is needed before the normal charging display screen appears.

If the watch is off while charging, the screen will display an status as below.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types Mobile Phone (FCC ID: 2AD6NA180) has also been tested against this SAR limit. The highest reported SAR values for Mouth-worn and Wrist-worn are 0.40 W/kg and 0.51 W/kg respectively. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's Mouth and 0mm for the Wrist-worn. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
