User Guide

About Polaroid LINK Smartphones

Polaroid LINK smartphones are shipped unlocked and offer the flexibility of using any GSM network (AT&T, T-Mobile and more) and plan you want without any commitment.

SIM card (not included)
If you already have a SIM card, please refer to "**Inserting the SIM card and battery**". If you do not have a SIM card, you can purchase one at many major retailers, mobile phone carriers or electronics stores.

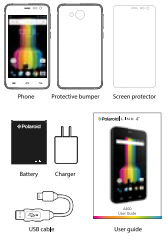
Supported Bands:
GSM 850/900/1800/1900 MHz
4G HSPA+ 850/1700 (AWS)/1900 MHz

4G HSPA+
This phone is HSPA+ capable. HSPA+ is a cellular network data protocol capable of data speeds much faster than standard 3G. In some cases, HSPA+ comes close to LTE speeds but is more widely available than LTE because it uses 3G networks. With an HSPA+ connection this phone can stream videos, download apps, upload photos or anything else that requires a high speed data connection.

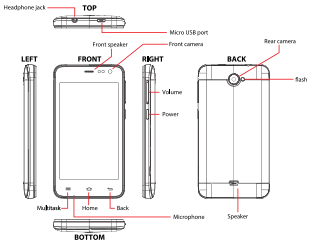
Accessibility
See, hear, speak, feel, and use. Accessibility features are there for everyone. Nothing to make things easier.

To use Accessibility features, go to Settings> Accessibility.

In the Box

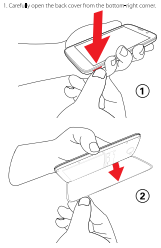


Location of Controls



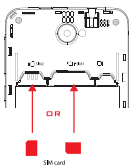
Inserting the SIM Card and Battery

1. Carefully open the back cover from the bottom-right corner.



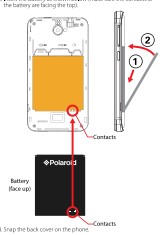
Charging

2. Insert a SIM card into either SIM card slot.
(SIM card is not included)



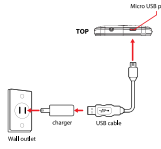
Dual SIM
The dual SIM card slots offer the convenience to access two different phone numbers simultaneously. Additionally, the dual SIM card slots allow you to have two carrier options, such as having regional and international phone numbers.

3. Insert the battery as shown below (make sure the contacts of the battery are facing the top).



4. Snap the back cover on the phone.

Connect the USB cable to the charger and phone.



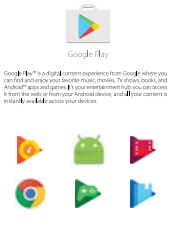
Battery Tips:
- Turn off Wi-Fi and Bluetooth when not in use.
- Lock the phone (turning the display off) to shorten charging time.
- To optimize battery time and performance, adjust the "Brightness" and "Sleep" options in the Settings app.

Turning ON

1. Press and hold the Power button to get started.
2. Follow the initial setup wizard prompts.
3. To use the Google Play store, sign into or create a Google account.

If you use Gmail™ you already have a Google account and you can create an account now.

Google Play™

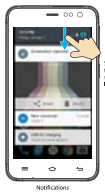


Google Play™ is a digital content experience from Google where you can find and enjoy your favorite music, movies, TV shows, books, and Android™ apps and games. Is your entertainment? So you can access it from the web or from your Android device, and all your content is instantly available across your devices.

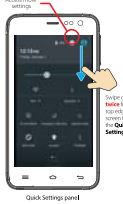
FRONT

Notifications and Quick Settings

Notifications
You can browse and reply to your emails, text messages and missed calls on the Notifications screen.



Quick Settings
Easily turn up or change Wi-Fi, Bluetooth, Airplane mode and other settings.

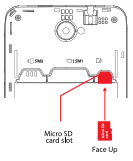


Expandable Storage

You can expand the phone's storage with a Micro SD card (not included).

Inserting a Micro SD card:
Open the back cover, and slide the Micro SD card into the Micro SD card slot as shown below.

To remove the Micro SD card, use your fingernail to slide it out.



Safety, Regulatory and Legal

Battery Use & Safety
Warning: Improper battery use may result in fire, explosion or other hazard.
- Do not try to take apart or fix your phone. Attempting to take apart or modify your phone may damage the battery and may cause burning and injury.
- Don't crush, bend, or expose your phone to heat or liquid. This may damage the battery and may cause burning and injury.

Battery Charging
Charging a battery using your mobile device and charger near room temperature for efficient battery charging. • New batteries are not fully charged. • New batteries or batteries stored for a long time may take more time to charge. • The AC/DC charger is intended for indoor use only.

Driving Precautions
Responsible and safe driving is your primary responsibility when driving a vehicle. Using a mobile device or accessory while driving may cause distraction and hazards to you or others. For example, • Do not leave your mobile device or its accessories within the deployment area of an air bag. • Concentration on driving, and if you using the mobile device if you can't concentrate, pull over safely before using your mobile device to send messages, surf the web, or use other applications.

Seizures, Blackouts & Eyestrain
Electronic games and switch activities, if it is a good idea to look at the screen a comfortable distance from your eyes, use a well-lit area, and take frequent breaks. Stop using the mobile device if you are tired or need rest. Some people have reported to have fainted when exposed to flashing lights or light patterns such as when playing video games, or watching video with flashing lights or effects. Discontinue use and consult a physician if any of the following symptoms occur: seizures, blackout, convulsion, eye or muscle twitching, loss of awareness, or disorientation.

Caution about High Volume Usage
WARNING: Exposure to loud noise from any source for extended periods of time may affect your hearing sensitivity. The louder the sound, the less time is required before your hearing could be damaged. To protect your hearing: • Limit the amount of time you use headsets or headphones at high volume. • Avoid turning up the volume to block out noisy surroundings. • Turn the volume down if you can't hear people speaking near you. • Follow your headset or headphone's instructions for the safe use of presets on the device. If you are unsure, bring it to your store, or in-office sales so you find it easy listening to the device through your headset or headphones and have your hearing checked.

Repetitive Motion
When you perform repetitive actions, such as pressing keys, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

Children
Scientific evidence indicates wireless phone use poses no known dangers to the users, including children and teenagers. If you are concerned about avoiding the potential risks caused by radio frequency energy (RF), you may want to limit your children's RF exposure by limiting their mobile device phone use. Parents of children who choose to use a mobile device should advise their children that while there is presently no scientific evidence suggests any harm, caution and sensible cell phone use is limited in any way. Keep your mobile device and its accessories out of the reach of children. Small parts may cause a choking hazard if eaten or swallowed. For example, a choking hazard may exist for small, detachable parts. If this does use your mobile device, monitor their access to it to prevent unauthorized charges for data or purchases.

Radio Frequency (RF) Energy
Your mobile device contains a transmitter and receives of RF energy. It is designed to comply with regulatory requirements concerning human RF exposure. For more information, see the "**Specific Absorption Rate (SAR)**" section. • Use only the supplied or approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the mobile device, void its warranty, and violate regulations. • **Secure personal information:** Your mobile device can store personal information in various locations, including your SIM card, memory card, and phone memory. When you recycle, return, or give away your mobile device, make sure you have removed all personal information. Before you dispose of your mobile device, back up the contents to a new device. • **Applications and updates:** Choose your apps and updates carefully, and install them from trusted sources. Some apps can impact your mobile device's performance and/or have access to private information including account details, call data, and your location. Only use apps from trusted sources, such as those downloaded with Google Play. If your mobile device is lost or stolen, or if you want to verify the security of your mobile device, change your password to help prevent unauthorized use. • **Location based information:** To locate your mobile device, applications can use GPS signals sent to cell towers, which can provide approximate location data. • **Backup personal information:** Be sure to backup your personal data to transfer to a new device. • **Applications and updates:** Choose your apps and updates carefully, and install them from trusted sources. Some apps can impact your mobile device's performance and/or have access to private information including account details, call data, and your location. Only use apps from trusted sources, such as those downloaded with Google Play. If your mobile device is lost or stolen, or if you want to verify the security of your mobile device, change your password to help prevent unauthorized use. • **Location based information:** To locate your mobile device, applications can use GPS signals sent to cell towers, which can provide approximate location data. • **Avoid interference:** Avoid areas where wireless devices are prohibited, such as hospitals and airplanes. • **Other important safety information:** Only qualified personnel should service the mobile device or install it in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that applies to the device. • **Driving safety:** Check the laws and regulations on the use of wireless devices in the areas where you drive. Always obey them. Also, if using your mobile device while driving, please: • Give full attention to driving and to the road. Using a mobile device may be distracting. Discontinue use if you can't concentrate while driving. • Use hands-free operation, if available. • Pull off the road and park before making or answering a call if driving conditions so require.

Follow Instructions to Avoid Interference Problems
Turn off your mobile device in any location where posted notices instruct you to do so such as hospitals and medical facilities. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Children
Scientific evidence indicates wireless phone use poses no known dangers to the users, including children and teenagers. If you are concerned about avoiding the potential risks caused by radio frequency energy (RF), you may limit your children's RF exposure by limiting their mobile device phone use. Parents of children who choose to use a mobile device should advise their children that while there is presently no scientific evidence suggests any harm, caution and sensible cell phone use is limited in any way. Keep your mobile device and its accessories out of the reach of children. Small parts may cause a choking hazard if eaten or swallowed. For example, a choking hazard may exist for small, detachable parts. If this does use your mobile device, monitor their access to it to prevent unauthorized charges for data or purchases.

Radio Frequency (RF) Energy
Your mobile device contains a transmitter and receives of RF energy. It is designed to comply with regulatory requirements concerning human RF exposure. For more information, see the "**Specific Absorption Rate (SAR)**" section. • Use only the supplied or approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the mobile device, void its warranty, and violate regulations. • **Secure personal information:** Your mobile device can store personal information in various locations, including your SIM card, memory card, and phone memory. When you recycle, return, or give away your mobile device, make sure you have removed all personal information. Before you dispose of your mobile device, back up the contents to a new device. • **Applications and updates:** Choose your apps and updates carefully, and install them from trusted sources. Some apps can impact your mobile device's performance and/or have access to private information including account details, call data, and your location. Only use apps from trusted sources, such as those downloaded with Google Play. If your mobile device is lost or stolen, or if you want to verify the security of your mobile device, change your password to help prevent unauthorized use. • **Location based information:** To locate your mobile device, applications can use GPS signals sent to cell towers, which can provide approximate location data. • **Avoid interference:** Avoid areas where wireless devices are prohibited, such as hospitals and airplanes. • **Other important safety information:** Only qualified personnel should service the mobile device or install it in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that applies to the device. • **Driving safety:** Check the laws and regulations on the use of wireless devices in the areas where you drive. Always obey them. Also, if using your mobile device while driving, please: • Give full attention to driving and to the road. Using a mobile device may be distracting. Discontinue use if you can't concentrate while driving. • Use hands-free operation, if available. • Pull off the road and park before making or answering a call if driving conditions so require.

Operational Warnings
Obey all posted signs when using mobile devices in public areas. Potentially explosive areas are often, but not always, posted and can include fueling areas, fueling stations, below deck on boats, locations for chemical or fuel storage or transfer, areas where the air contains chemicals or particles such as grain dust, or metal powders. Turn off your mobile device before entering such an area, and do not charge batteries in such areas, sparks can occur and cause an explosion or fire.

Follow Instructions to Avoid Interference Problems
Turn off your mobile device in any location where posted notices instruct you to do so such as hospitals and medical facilities. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Medical Devices
Pacemakers: We recommend that a minimum separation of six inches be maintained between a mobile device and a pacemaker to avoid potential interference, as recommended by manufacturers and independent research by Wireless Technology Research. Persons with pacemakers should: • Always keep the mobile device more than six inches from their pacemaker when the mobile device is turned ON. • Do not carry the mobile device in the breast pocket opposite the pacemaker. • Use the ear opposite the pacemaker to minimize the potential for interference. • Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Privacy & Data Security
Please understand that privacy and data security are important to everyone. Because some of your mobile device may affect your privacy or data security. To help protect your privacy, follow these recommendations: • **Monitor access:** Keep your mobile device with you and don't leave it where others may have unmonitored access. Use password security features and lock your device when it is not in use. • **Keep software up to date:** If the manufacturer or a software provider releases a security update for your mobile device's software, install it as soon as possible. • **Secure personal information:** Your mobile device can store personal information in various locations, including your SIM card, memory card, and phone memory. When you recycle, return, or give away your mobile device, make sure you have removed all personal information. Before you dispose of your mobile device, back up the contents to a new device. • **Applications and updates:** Choose your apps and updates carefully, and install them from trusted sources. Some apps can impact your mobile device's performance and/or have access to private information including account details, call data, and your location. Only use apps from trusted sources, such as those downloaded with Google Play. If your mobile device is lost or stolen, or if you want to verify the security of your mobile device, change your password to help prevent unauthorized use. • **Location based information:** To locate your mobile device, applications can use GPS signals sent to cell towers, which can provide approximate location data. • **Avoid interference:** Avoid areas where wireless devices are prohibited, such as hospitals and airplanes. • **Other important safety information:** Only qualified personnel should service the mobile device or install it in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that applies to the device. • **Driving safety:** Check the laws and regulations on the use of wireless devices in the areas where you drive. Always obey them. Also, if using your mobile device while driving, please: • Give full attention to driving and to the road. Using a mobile device may be distracting. Discontinue use if you can't concentrate while driving. • Use hands-free operation, if available. • Pull off the road and park before making or answering a call if driving conditions so require.

Limited Warranty

Battery Disposal & Recycle
Dispose of the battery in accordance with government regulations. We encourage you to call the number below to have the battery recycled and help protect the environment.

☎ 1-800-822-8837

RSR Holdings, LLC. (e) licenses and affiliates, LLC support all electronic waste initiatives. As responsible stewards of the environment, and to avoid unfilling waste in landfills, you should properly dispose of this product in compliance with all local and federal laws, directives or other governances in the area where you reside. Please check with the local authorities or the retailer where you purchased this product to determine a location where you can appropriately dispose of the product.

You may also go to www.rsrholdings.com and reference **Social Responsibility** (http://www.rsrholdings.com/social-responsibility) to learn more about the specific items in your area and to locate a collection facility near your home.

If your electronic device has internal memory on which personal or other confidential data may be stored, you may want to perform a data sanitization process before you dispose of your device to ensure another party cannot access your data. Please refer to your device's user guide for instructions on how to, and you may want to research the best sanitization process for your device before disposal. You may also check with your local recycling facility to determine their data sanitization procedures during the recycling process.

Specific Absorption Rate (SAR)
This phone meets the government's requirements for exposure to radio waves. Your phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the FCC. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones uses a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general the closer you are to a wireless base station antenna, the lower the power output.

Body-worn Operation
This phone was tested for typical body-worn operations with the back of the phone kept 0.4 inch (1cm) between the user's body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.4inch (1cm) must be maintained between the user's body and the back of the phone. The clamp on the belt, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.4 inch (1cm) separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

FCC Part 15:
This equipment has been tested and found to comply with the requirements for a Class B digital device, pursuant to Part 15 of the Federal Communications (FCC) Rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • Reorient or relocate the receiving antenna. • Increase the separation between the equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. • Consult the dealer or an experienced radio/TV technician for help.

15.19 Labelling requirements.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device does not cause harmful interference.
15.21 Information to user.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Shielded USB cables must be used with this unit to ensure compliance with the Class B FCC limits.

FCC RF Exposure information
WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and those international standards.

Limited Warranty

LIMITED WARRANTY TO ORIGINAL CONSUMER

This Product (including any accessories included in the original packaging) as supplied and distributed new by an authorized retailer is warranted by RTI to the original consumer purchaser against defects in materials and workmanship ("Warranty") as follows:

Product Type: Smartphone | Territory - United States / Canada
Parts Warranty: 1 Year | Labor Warranty: 1 Year

Customer Support:
☎ **1-877-268-6481** (1-877-Fixed Mobile) • Monday-Friday 8AM – 10PM (EST)
✉ **www.southerntelecom.com**
(Click on "Product Support")

TO OBTAIN WARRANTY SERVICE:
• Call the Customer Support number listed above, or go to our website portal and follow the instructions for returning the Product for warranty service. Please package Carefully. Packaging damaged in transit prior to the authorized service centre, and inconvenience to insure your return. Include a return shipping address (no PO Boxes), a daytime phone contact number, and the defective unit within the package. • Describe the defect or reason you are returning the product.

Your product will be repaired or replaced, at our option, for the same or similar model if it fails in normal examination by the service centre determined the product is defective. Products received damaged as a result of shipping will require you to file a claim with the carrier.

The shipping address of the authorized service center is:

Customer Service Dept. 36
c/o Southern Telecom
400 Kennedy Drive
Sayreville NJ 08872

Warranty service not provided
This warranty does not cover damage resulting from accident, misuse, abuse, liquid contact, fire, improper packaging and shipping, improper installation, unauthorized modifications such as the flashing of custom firmware. This warranty is void in the event any unauthorized person opens, alters or repairs this product. If product is being returned to the authorized service center for repair must be sealed & packaged.

NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, (INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE) APPLY TO THE PRODUCT AFTER THE EXPRESS WRITTEN WARRANTY PERIOD STATED ABOVE, EXCEPT AS REQUIRED BY LAW. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY RTI, ITS AGENTS OR EMPLOYEES SHALL CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS WARRANTY. RTI EXPRESSLY DISCLAIMS ANY IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE OTHER THAN THE FOREGOING, CONSUMER'S EXCLUSIVE REMEDY AGAINST RTI OR ITS SUPPLIERS SHALL NOT EXCEED THE PURCHASE PRICE OF THE PRODUCT SOLD BY RTI. THIS LIMITED WARRANTY IS THE PRODUCT SOLD BY RTI TO THE ORIGINAL CONSUMER WHO PURCHASED THE PRODUCT AND IS NOT TRANSFERABLE.

Some countries, states or provinces do not allow the exclusion or limitation of incidental or consequential damages or limitations on warranties, so limitation or exclusions may not apply to you. This warranty gives you specific legal rights, and you may have other rights which vary from state or province to province. Contact your authorized retailer to determine if another warranty applies.
