Wall Mounting Guide

(with 3M VHB™ tape)

1

Apply tape to the wall mount plate.

2

Clean the surface and let dry. [1]

3

Apply on surface with 45 degree slope to avoid air bubbles. [2]

4

Press firmly on the surface for 30 seconds. [3]

5

Wait 24 hours

Wait for at least 24 hours before use.

6

Point at the groove and rotate the camera base to mount it on.

Notice: Failure to follow instructions carefully may cause an accident. It is strongly recommended to mount your Beseye camera on the wall by frame anchors and screws as packaged as well to avoid possible application problems.

Important Notes and Warnings

- [1]: Clean the surface thoroughly before applying should be fully implemented. If the surface has any contaminants e.g. dust, dirt, grease, loose paint, etc., the tape will not stick to it. Also, when cleaning concrete walls, wipe with dry rags and avoid cleaners with alcohol.
- [2]: Surfaces that 3M VHB™ Tape will stick well: sealed/painted surface such as painted Gyprock®, stained or varnished wood, painted smooth concrete, glass, ceramic tile and stainless steel. Surfaces such as unpainted surfaces, rough or porous surfaces like bricks, bare wood, wall paper, plastic surfaces such as vinyl should be avoid.
- [3]: 3M VHB™ tape is made by Pressure-Sensitive Adhesive (PSA), pressing firmly will increase the durability of the tape.
- [4]: Make sure you place Beseye securely. Beseye may be hot to the touch during operation. Please place the cord out of reach of children.

How to use

1. Camera list

There are cameras in camera

2. Player

- a. Play/Pause : Pause and resume
- b. Two way talk button
- c. Event list
- d. Back to live feed

Federal Communications Commission (FCC) Statement

15.21

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

15.105(b)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation of the device.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.
