

RF EXPOSURE EVALUATION

For

Osterhout Design Group, WFC

Per

**KDB 447489 D01
General RF Exposure v05r02**

Section 4.3.1

#1

SAR Test Exclusion Thresholds for 100MHz to 6GHz Claculation:

$$[(\text{Max Peak Power in mW})/(\text{min separation distance in mm})] \times [f_{\text{GHz}}]^{1/2}$$

$$= [(0.28)/(5)] \times [2.48]^{1/2} = 0.1$$

Threshold is ≤ 7.5

Hence, this device is exempt from SAR Testing.
