Photo 2: Left cheek	Photo 3: Left tilted
 A photograph showing the left cheek of a test subject (a white mannequin head) positioned on a black mechanical test fixture. The fixture includes a white foam pad and various adjustment knobs. The background shows a laboratory setting with equipment and a window.	 A photograph showing the left cheek of the test subject tilted at an angle on the same mechanical test fixture. The setup is similar to Photo 2, but the head is rotated to show a different perspective of the cheek area.
Photo 4: Right cheek	Photo 5: Right tilted
 A photograph showing the right cheek of the test subject positioned on the mechanical test fixture. The white foam pad and black frame are visible, with the mannequin head's right side facing the camera.	 A photograph showing the right cheek of the test subject tilted at an angle on the mechanical test fixture. This view provides a different perspective of the right cheek area compared to the standard position in Photo 4.
