April 29, 2020

Dear Sir or Madam,

This application for FCC ID: 2ADEPCMUE6-B will cover one model: CMU-E6X. The Communication Management Unit is a tracking device using a GNSS receiver, and a 4G/2G cellular modem. A wireless mesh network manager is included to connect local sensors. A wireless mesh mote is included that communicates to a local manager for fleet management.

CMU-E6X has a large case that contains eight D-size lithium batteries.

Sincerely,

A handwritten signature in black ink, appearing to read 'Edward J. Mansfield', written over a horizontal line.

Edward J. Mansfield, P.E.
