

1 FCC and IC

B&R products satisfy EMC requirements for operation in the USA and Canada and are compliant with FCC and IC regulations. Corresponding "Radio Frequency Interference Statements" for the USA and Canada:

USA: This device complies with Part 15 of the FCC Rules and with Industry Canada licenseexempt RSS standard(s). Operation is subject to the following two conditions: Federal Communi- (1) this device may not cause harmful interference, and (2) this device must accept cations Commission any interference received, including interference that may cause undesired operation. (FCC)

Canada: Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux Industry Canada (IC) appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

If products are equipped with an additional RFID read/write device, it must be approved for operation in the USA and Canada. These types of products are identified by a sticker with Contains FCC ID and Contains IC ID on the RFID read/write device. In addition to the sticker for products with an RFID read/write device, the following requirements also apply:

Information:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Information:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.
