Test Report

Prepared for: SMK USA

Model: XY4D

Description: This is a TAG that tracks valuables. These valuables can be items or people. It performs this by finding its location with BLE beacon. It transmits its position via BLE

Serial Number: 8

FCC ID: 2ADLN-XY4D1

To

FCC Part 1.1310

Date of Issue: October 18, 2017

On the behalf of the applicant:

**XY – The Findables Company
1133 Columbia St.
Suite 205
San Diego, CA 92101**

By the request of:

**SMK Manufacturing, Inc.
1055 Tierra Del Rey
Suite H
Chila Vista, CA 91910**

Attention of:

**Leon Gateno, Sr RF Engineer
Ph: (619)216-6425
Email: lgateno@smkusa.com**

**Prepared By
Compliance Testing, LLC
1724 S. Nevada Way
Mesa, AZ 85204
(480) 926-3100 phone / (480) 926-3598 fax

ILAC / A2LA

Compliance Testing, LLC, has been accredited in accordance with the recognized International Standard ISO/IEC 17025:2005. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer joint ISO-ILAC-IAF Communiqué dated January 2009)

The tests results contained within this test report all fall within our scope of accreditation, unless below

Please refer to <http://www.compliancetesting.com/labscope.html> for current scope of accreditation.

Testing Certificate Number: **2152.01**

FCC Site Reg. #349717

IC Site Reg. #2044A-2

Non-accredited tests contained in this report:

N/A

EUT Description

Model: XY4D

Description: This is a TAG that tracks valuables. These valuables can be items or people. It performs this by finding its location with BLE beacon. It transmits its position via BLE

Firmware: codeless_585

Software: N/A

Serial Number: 8

Additional Information: None

SAR Exclusion

The 1-g and 10-g SAR test exclusion thresholds for 100 MHz to 6 GHz at *test separation distances* ≤ 50 mm are determined by:

$$\frac{[(\text{max. power of channel, including tune-up tolerance, mW})/(\text{min. test separation distance, mm})]}{[\sqrt{f(\text{GHz})}]} \leq 3.0$$
 for 1-g SAR and ≤ 7.5 for 10-g extremity SAR,²⁵ where

- $f(\text{GHz})$ is the RF channel transmit frequency in GHz
- Power and distance are rounded to the nearest mW and mm before calculation²⁶
- The result is rounded to one decimal place for comparison
- 3.0 and 7.5 are referred to as the numeric thresholds in the step 2 below

The test exclusions are applicable only when the minimum *test separation distance* is ≤ 50 mm and for transmission frequencies between 100 MHz and 6 GHz. When the minimum *test separation distance* is < 5 mm, a distance of 5 mm according to 5) in section 4.1 is applied to determine SAR test exclusion.

Max Power in mW = 3.95 mW
Min. Test Separation Distance = 5 mm
Frequency of Operation in GHz = 2.402

$$\frac{3.95 \text{ mW}}{5 \text{ mm}} \times [\sqrt{f(2.402)}] = 1.224$$
