FCC ID: 2ACN5BL100

Package content

Please check for the following content in package:

- Integrated Bluetooth device.
- Microphone covers X4.
- USB charger cable.

Power on and Power off

Power on

Push and hold the "Power/Volume" button for at least 3 seconds. You will see the blue led flash and hear a beep in the speakers. The device is powered on!

Power off

Push and hold the "Power/Volume up" button for at least 8 seconds. You will see the red LED flash and hear a beep in the speakers. The device is powered off!

Pairing with your mobile phone

Please make sure the BL100 is in power off state. Push the Power/Volume button for at least 8 seconds till the LED flashes in red and blue which indicates the device is in pairing mode.

Enable your Bluetooth function on your mobile phone. Your mobile phone will now scan nearby devices and find a device named "BL-BIH001A". Please allow your mobile phone to pair with this device.

Once pairing between the two devices is successful, the LED lights on the BL100 will change from red and blue flashing lights to a stable blue light only.

Note: If a PIN code is required by your mobile phone, please enter "0000".

Once pairing between the two devices is successful, the two devices can be reconnected automatically the next time they are powered on.

Pairing with a second Bluetooth device or mobile phone

Please repeat the same steps as above. After pairing with the second device successfully, push both "Power/Volume up" and "Volume down" button of BL100 at same time. A beep in the speaker indicates that the device is connecting both of the devices now. In the first paired mobile phone Bluetooth device list, select the "BL-BIH001A" device which is already paired again. Once the first paired mobile phone reconnects with BL100 successfully, your Bluetooth connects with both devices/mobile phones simultaneously.

Mobile phone functions

Call answer

When there is incoming call, you need no further action on BL100 device and it will pick up your phone after ringing for 6 seconds. When there is an incoming call you can let the unit automatically answer for you after 6 seconds.

Call end

To end the call manually, please press and release the "power/volume up" button.

When your BL100 paired with two mobiles and you are in conversation through one of them, but there is incoming call in another mobile phone. You can pick up the incoming call while hold on the first call by push "Power/Volume up" button for 1 second. When you push "Power/Volume up" button a second time under such condition, the device will end the current call and resume the first call.

Volume control

Push and hold the "Power/Volume up" button to increase the speaker volume during phone call. Push and hold the "Volume down" button to decrease the volume during phone call.
