1. Warning: Changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

2. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient the equipment, increase the separation between the equipment and receiver, connect the equipment into a different branch of the circuit to which the receiver is connected. Consult the dealer or an experienced radio/television technician for help.

3. Discontinued cables may be used with this unit to ensure compliance with the Class B FCC limits.

The distance between user and products should be no less than 20cm
