4. Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications (including the antennas) to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement: This equipment complies with FCC RF Radiation exposure limits set forth for an uncontrolled environment.

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

5. Module Integration Guide

1. Applicable FCC Rules

- CFR 47 Part 15.247

2. Operational Condition

The module is limited to OEM installation ONLY. The OEM integrator is responsible for ensuring that the end-user has no manual instruction to remove or install module.

3. Limited Module Procedure

BWR-YSP88459-SMA is limited Module. The module doesn't have its own power supply regulation. Therefore, the host product manufacturer must design the host product. so that a constant voltage of 3.3V is applied to the module.

4. Trace antenna desings : N/A

5. RF Exposure consideration (CFR 47 Part 1, 1.1307(b), 1.1310)
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
This equipment should be installed and operated with minimum 20 cm between the radiator and human body.

6. Antenna
This modular has PCB pattern antenna. Any changes of antenna designs might require additional assessment. The Host antenna type shall be same type and antenna gain shall be less or equal to below information.

Item	Contents	
Antenna Type	PCB Pattern Antenna	
Antenna peak gain	Ant 1	2 400 MHz ~ 2 483.5 MHz: 2.28 dBi
		5 150 MHz ~ 5 250 MHz: 1.68 dBi
		5 250 MHz ~ 5 350 MHz: 1.68 dBi
		5 470 MHz ~ 5 725 MHz: 2.38 dBi
		5 725 MHz ~ 5 850 MHz: 3.04 dBi
	Ant 2	2 400 MHz ~ 2 483.5 MHz: 1.84 dBi
		5 150 MHz ~ 5 250 MHz: 1.90 dBi
		5 250 MHz ~ 5 350 MHz: 2.92 dBi
		5 470 MHz ~ 5 725 MHz: 3.55 dBi
		5 725 MHz ~ 5 850 MHz: 3.32 dBi

7. Label and compliance information

The end user manual shall include all required regulatory information/warnings as shown in this manual. If the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID : 2ADQJ-YSP88459SM" any similar wording that expresses the same meaning may be used.

8. Information on test modes and additional testing requirements

This modular was tested in standalone configuration. Integration of this modular into a host equipment would require additional testing.

9. Additional testing, Part 15 Subpart B disclaimer

The grantee should include a statement that the modular transmitter is only FCC authorized for the specific rule parts (i.e., FCC transmitter rules) listed on the grant, and that the host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. If the grantee markets their product as being Part 15 Subpart B compliant (when it also contains unintentional-radiator digital circuitry), then the grantee shall provide a notice stating that the final host product still requires Part 15. Subpart B compliance testing with the modular transmitter installed.
