Regulatory Information

FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

EU Conformity Statement

 This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the RE Directive

2014/53/EU, the EMC Directive 2014/30/EU, the LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see:

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: ***www.recyclethis.info***

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements. This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. this device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radioexempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

1. l'appareil ne doit pas produire de brouillage, et
2. l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be

so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante.

1 Product Introduction

Nameplate camera (hereinafter referred to as “device”) is a wearable intelligent digital nameplate with audio and video recording functions. It offers two types: with screen or without screen. The device with screen adopts the electronic ink screen that enables flexible settings of digital nameplate information.

Note

The device without screen has no screen. The actual device prevails.

Danger

The device adopts magnetic design. DO NOT use the device if you had surgery before (for example, installed metal or pacemaker in the body).

The device supports to wear with the magnet or pin. When wearing light clothing, you can put the device on your clothing and fix it with the magnetic plate. When wearing thick clothing, you can use the pin on the

back plate to clip the device on your clothing, and use the magnetic plate to fix the device.

Keep your clothing flat when wearing the device to avoid affecting the recording effect.

3 Device Operation via Mini AI Assistant

3.1 Add Device

You can scan the below QR codes to get and install the Mini AI Assistant application, and then add a device to set.

Android

iOS

Steps

1. When the device is on, hold the Wi-Fi button to enable the Wi-Fi AP.
2. Enable the WLAN of the mobile terminal, find the device Wi-Fi AP on the available list, and enter the password to connect.

Note

- The device Wi-Fi AP naming method: miniAI-serial No.
- The initial password of device Wi-Fi AP is “abcd1234”. Please change the password via the Mini AI Assistant (see the Mini AI Assistant for details).

- If the mobile terminal is not connected to the Wi-Fi AP after 3 minutes, the Wi-Fi AP will automatically turn off. If you want to connect to the Wi-Fi AP, you can hold the Wi-Fi button again to enable the Wi-Fi AP.
-

3. Open the Mini AI Assistant. The connected device will display on the device list, and its status will be “Online”.

What to do next

You can select the connected device to view, operate, and set. See the Mini AI Assistant for details.

3.2 Set Digital Nameplate

For the device with screen, you can set the nameplate information displayed on the screen.
