Re: Confidential Treatment Request of FCC ID No. 2ADU4-7823

Dear Federal Communications Commission:

Pursuant to 47 C.F.R. §0.457 and 47 C.F.R. §0.459 and on behalf of Sampson Rye Ridge LLC and its affiliates, I am writing to request confidential treatment of the product identified as FCC ID No. 2ADU4-7823 which is attached as an exhibit to the equipment authorization application.

In regards to short-term confidentiality, we would like to request 180 days of confidential treatment (from the date of grant of the equipment authorization for FCC ID No. 2ADU4-7823, for the following confidential materials contained in our application: 1) User manual/guide; 2) Test setup photos; 3) Internal photos; 4) External photos; and 5) Antenna photos. These materials contain proprietary information about our device that is not available to the public, and we only share this information with 3rd parties who guard the confidentiality of such information. If this information were to be disclosed before the marketing of our device, it would negatively affect our business and be detrimental in our efforts to successfully launch the device.

In regards to long-term confidentiality, we would like to request indefinite confidential treatment for the following confidential materials contained in our application: 1) Antenna Specifications; 2) Schematics; 3) Block diagram; 4) Operation description; and 5) Tune up procedure. These materials contain sensitive technical and design information about our device that we share only on a need-to-know basis, subject to confidentiality agreements, even after we begin marketing and selling the device. If this information were to be disclosed, our competitors would gain an unfair commercial advantage over us by learning about our product design and development processes. This in turn would negatively affect our ability to compete.

Please let me know if you have any questions or concerns. Thank you in advance for your time and support of our request.

Best regards,

A handwritten signature in cursive script, appearing to read "Elizabeth Wenzel".
