

TRANSMITTER

BELT-PACK TRANSMITTER (AWX6070B-M or AWX6070B-H)

1. Power and Audio Mute Switch.
2. Antenna: Transmit the RF signal of transmitter.
3. Belt Clip: Attach the transmitter to the belt.
4. Audio Input Jack: it is suitable for lavalier system/headset system.
5. Low Battery Indicator: Red light glows when it is lack of power and should renew the battery.
6. Lavalier Microphone (for AWX6070B-M)
7. Headset Microphone (for AWX6070B-H)

SPECIFICATIONS TRANSMITTER

Carrier Frequency Range	UHF Band
Frequency Stability	$\pm 0.005\%$
Modulation	Frequency Modulation (FM)
Modulation Depth	40KHz
Output Power	0.0125W
Spurious Emission	>55dB
Battery	2x1.5V AA Battery
Current Consumption	<40 mA
Dimensions (W X H X D)	Belt-Pack: 2.6" X 3.9" X 1.1" (65x100x30mm)

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
