Subject: Requesting Class II permissive change for FCC ID: 2ADXS-WFM60-SFP2501

Dear Examiner,

The purpose of this letter is to request a Class II Permissive change for FCC ID: 2ADXS-WFM60-SFP250.

The major change filed under this application is:

The subject certified transmitted module is being used in a Thermal Printer, model MP-B30-W02JK1U. This is a portable device and as the modular approval does not cover portable hosts this C2PC is required to add this specific host to the scope of the modular approval.

To demonstrate the compliance, following has been taken for this application:

1. SAR testing has been conducted on the host equipment.
2. Radiated emission testing was not additionally performed due to the following.
 - Output power remains unchanged from original modular approval.
 - The antenna used in the host is of the same internal antenna and equal gain to the one covered by the modular approval.
3. The software security remains unchanged from the original application.

Best Regards

Hidehiro Fujiwara
