

Nonconformities FCC ID: 2ADZG-M3I (CKC CS Ref # 95964-18-FCC)

The items listed below represent requests for information following review of this application for certification under United States (FCC) regulations. Further question may arise pending review of responses to these items.

OK	ID	#	Non-Conformity or Comment	Submitted Response	Respondent / Date of Response
x	TL	5	The test setup photos provided show the equipment tested without the exercise bike. It appears that all tests of the equipment were performed without an enclosure. Please explain why tests were performed in this manner. Please explain how the test results demonstrate compliance for the finished product.	Testing was performed without the bicycle parts in order to ensure that the worst-case antenna orientation was tested. The plastic shell was not utilized because communication wires and DC voltage wires were attached to the EUT to vary the frequency and test voltage. The plastic shell does not affect the emissions reported; the configuration tested represents the worst case emissions configuration.	CKC 3/18/2015
