6. LED Indicator
7. Micro USB charging port (Built-in rechargeable 1500m battery)

Connecting the Speakers

Connecting the Bluetooth Device

Optimum Settings

1. For best tonal fidelity, we recommend setting your audio source to line level output and use the speaker to control overall volume level.
2. This speaker system is most efficient when the volume level is set between 50% to 70%. You get highest sound quality and minimum distortion within these volume levels.

Safety Instructions

Caution: Electric Shock Hazard
DANGER
When using this electronic appliance, basic precautions should always be followed to reduce the risk of fire, electrical shock and injury to persons, including the following:

1. Do not use this product near water (i.e. bath tub or swimming pool).
2. Unplug from AC outlet when not in use and before cleaning.
3. Close supervision is necessary when used near children.
4. Clean only with dry cloth.
5. Do not attempt to repair the product on your own. It contains no user serviceable parts.

Regulatory Compliance

FCC Class B Information
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation.

CE Compliance for Europe

This equipment has been tested and found to comply with the limits for European Council Directive on the approximation of the law of the member states relating to electromagnetic compatibility (89/336/EEC) as according to EN55022 Class B.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.
