Meet with *Wistiki Community*
Wistiki is more than a connected item ;
it's also a community where users find
their lost belongings through mutual
assistance. Find us at www.wistiki.com

The Wistiki comes with :
- 1 colored-strap
- 1 double-sided adhesive
- 1 battery (replaceable) CR2032 3V

Free application can be
downloaded without subscription

VIRTUAL LEASH
You can activate the electronic leash
mode to be alerted when your item gets
far away from your smartphone. This way,
your favorite items can be put under
close surveillance to prevent their loss.

GPS LOCALISATION
Discover the GPS position of your
misplaced item on the application's
map. The GPS localisation correspond
to the position of Wistiki when it was
last detected next to your smartphone.

Hook or stick a Wistiki onto your keys, inside
your car, or wallet. You can then make the
wistiki ring and locate the wistiki all over
the world from your smartphone or tablet.
And if it's your smartphone you're looking
for, you can make it ring by pressing the
Wistiki ! Several Wistikis can be managed
using the same smartphone.
