使用说明书
operating instruction

【Music play】

After a TF card is inserted into the device, music files saved in the card can be played automatically, and audio formats of MP3, WMA, WAV, APE and FLAC are supported.

【Voice prompt function】

When the user starts the device, or Bluetooth is connected, or it is shifted between modes, or volume is adjusted to maximum or minimum, there will be corresponding voice prompts in the device.

【Data transmission function】

In power-off state, after connecting Micro USB data cable to USB port of the computer, the user can read the data in the inserted TF card, and perform normal operations such as copy, deletion and move.

【Bluetooth function】

Bluetooth music mode supports stereo audio transmission function.

Bluetooth call is supported, echo is eliminated, and communication is clear.

【AUX function】

In power-on state, insert AUX audio cable, and press M key to switch to AUX mode, and PC/MP3/MP4/PSP digital devices are supported.

【FM function】

With built-in FM radio modular, after AUX cable is inserted as an antenna, it can search for channels and save them automatically.

【NFC function】

With NFC technology and built-in NFC chip, it supports connecting to the mobile phone and Tablet PC with NFC function. Pair rapidly with just a touch.

【APP connection and control of Android device】

After installing APK software of SOAIY player into the device with a mobile phone or tablet PC of Android system 2.33 or above, it can be operated through the software interface. SOAIY APK software can be downloaded from its official website: www.soaiyaudio.com.

FCC Information and Copyright

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,

uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference

to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does

cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF warning statement: the device has been evaluated to meet general RF exposure requirement , The device can be used in portable exposure condition without restriction.
