To Whom It May Concern:

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. We have requested that the **(Block diagram, Operational description, Schematics)** required to be submitted with this application be withheld from public review permanently.

These documents contain detailed system and equipment description and related information about the product which Otter Products, LLC ("Otter") considers to be proprietary, confidential, and a custom design that would not be released to the general public. Furthermore, the related information is a basis from which future technological products will evolve, and Otter considers this information beneficial to its competitors. Disclosure of the information in these documents would give competitors an unfair advantage in the market.

Please contact me if there is any information you may need.

Sincerely,

DocuSigned by:
