

The diagram shows the rear panel of a Jensen VXR3014 receiver. At the top, there are two rows of terminals for power and ground connections. Below these is a large rectangular terminal block with various colored terminals. A central label provides wiring instructions for the terminals. Below the label, there are two rows of terminals for speaker connections. At the bottom, there are two rows of terminals for video and audio inputs. The receiver is shown with its top cover removed, revealing internal components like the tuner and amplifier.
