

5/13/2016

Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, MD 21046

To whom it may concern:

Breathometer, Inc. hereby requests a Permissive Change Class II of the radio equipment certification for the Mint certification number, FCC ID: 2AEJG MINT-01 . This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – No changes.
- (b) Functional capabilities. – Addition firmware has been added to the device as intended by the manufacturer. The additional firmware does not impace radio function.
- (c) Antenna Characteristics. – No changes.
- (d) Cosmetic differences – The previously approved device has been packaged in its entirety inside a polymer housing.

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Kenton Ngo  
Sr. Project Manager  
Breathometer, Inc.
