

Table 4 Product coordinates

Product Coordinates
 The image shows a cylindrical object, possibly a sensor or antenna, mounted in an anechoic chamber. The chamber walls are covered with dark, pyramid-shaped electromagnetic absorbers. A red laser line is visible, pointing downwards towards the top of the cylinder. A 3D coordinate system is overlaid on the image: a red arrow points upwards along the Z-axis, a blue arrow points to the right along the X-axis, and a green circle with a cross inside represents the Y-axis pointing out of the page. The cylinder itself is light-colored and has a small rectangular feature on its top surface.
