

Quick Start Guide

O-KAM Pro

Information to User

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Important: Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be installed and operated with minimum distance of 20cm the radiator your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna nr transmitter.

2. Select 2.4GHz Wi-Fi and enter the password.
3. Wait for the camera to connect to the router/server.

Live Streaming Interface

APP operation and use, video instruction

functional areas

Running the test

The app is configured and the test is run by clicking on the Live View window in the app. Then place the camera at the installation location for testing. Make sure the installation location has a strong Wi-Fi signal. If the Battery Camera does not work properly outdoors, you may need to move the router closer to the installation location or purchase a Wi-Fi extender.

Device Sharing

*Share open permission, the shared person can set the function of the device; if If you turn off the permission, you can only watch the video, but cannot set the function.

The camera is mounted and fixed:

1. Attach the camera bracket positioning sticker to the wall.
2. Using a drill tool, align the logo holes of the sticker and drill out the screw holes.
3. Place the green rubber stopper out of the drilled hole.

4. Use the screws that match the mounting bracket to secure the mounting bracket to the wall.
5. There are slots on both sides of the rear of the camera body, align them with the slots on both sides of the mounting bracket, and install them from top to bottom.

Note: This model of camera requires long-term use of 5V2A power supply.
Installation height 2-3 metres
