Subject: Certification Application, Attestation Letter Part 15.19 Labelling

FCC-ID: 2AF8D-NR38

To whom it may concern

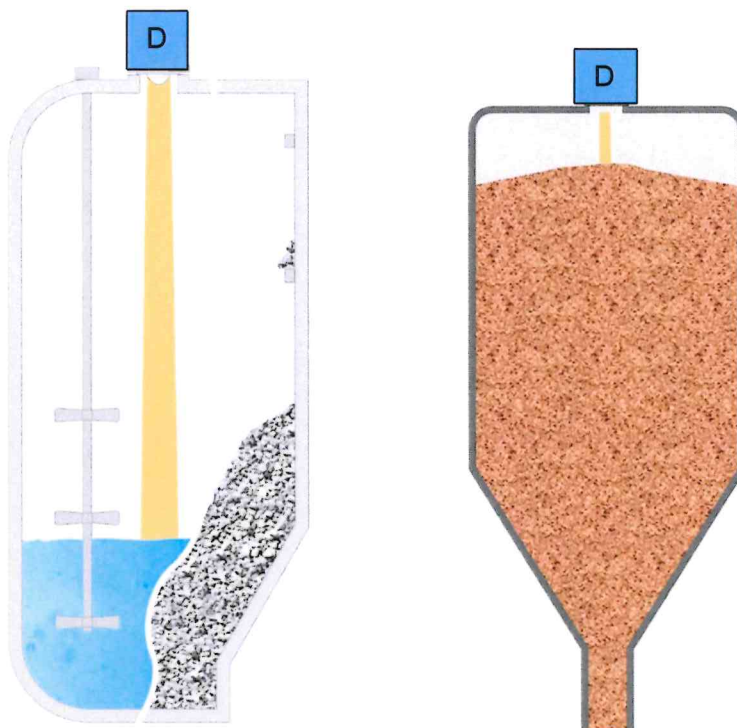

This document is used to declare that we, UWT GmbH, will not put the required Part 15.19 text on the product label and, instead, will include the details in the package leaflet. The information required by this paragraph would be placed in the user manual and would be placed on a removable label (package leaflet) attached to the device. Because of insufficient place on the product label an additional label would be required, which would have to be fixed next to the device in the responsibility by the user. This is not practical and additionally for normal use the access to the additional label would in the application limited and thus not be visible without additional effort (depending on the installation position and installation situation: for example, on a tank with a height of 120 m).

The package leaflet as part of the customer documentation will always be available and readable for the user.

1. Example for the product label:

2. Installation position:
(D = device)

Yours faithfully,

i.v. B. Schönmetzler
