

尺寸：280x100mm

User’s Guide for
Battery WiFi Camera

Product Features

- 2x18650 batteries work regularly for 2~4 months
- FHD Megapixels collocated with wide-angle lens
- Support mobile phone remote fast wake-up within 6 second
- 2.4G Wi-Fi connection
- Support PIR motion detection, when someone hovers at the door, it will send push alerts to your mobile phone immediately
- With IR-cut, it can switch automatically and it is clearly visible at both day and night to keep your home and family safe
- Support to power by USB port

Product Specification Sheet

Lens	FOV/130°Wide-angle lens (4Glass)
Infrared LEDs	10 pcs Infrared LEDs with 8 meters flash distance
PIR Motion Sensor	4~6 meters PIR distance
Storage	Up to 128GB Micro SD card
Connectivity	802.11b/g/n Wi-Fi@2.4G
Power consumption	Standby 200uA Working 260mA
Battery	2x18650 batteries
USB	DC5V
Wi-Fi distance	60 meters (open space without obstacle)15 meters (indoor)
Video Compression	H.264
Voice Intercom	Two-way audio with noise cancellation
Video resolution	1920*1080@15fps
Working Temperature	-10~ 55℃
Storage Temperature	-20~ 60℃

Product Design

- ①Lens
- ②Mic
- ③Light sensor
- ④LED
- ⑤Motion detection sensor
- ⑥Charge LED
- ⑦USB interface
- ⑧Speaker

Charge LED: Charging in Red; Full in Green.

- ①Reset button
- ②Mirco-SD card
- ③Power button
- ④18650 Battery
- ⑤Flip Switch

The Main Menu

Click for menu settings, see follow picture.

FCC warning statements:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
