◆ FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

RF exposure considerations

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Operations in the 6GHz bands

(1) Operation of transmitters in the 5.925–7.125 GHz band is prohibited for control of or communications with unmanned aircraft systems.

◆ CE Statement

RF & Power	
Frequency band(s)	Maximum power transmitted (E.i.r.p)
2400–2483.5 MHz (BT)	7.95dBm
2400–2483.5 MHz (WiFi)	19.94dBm
5150–5250 MHz	21.36dBm
5250–5350 MHz	19.95dBm
5470–5725 MHz	19.93dBm
5725–5875 MHz	13.93dBm
5945–6425 MHz	15.00dBm

Restrictions on putting into service to Europe:

5150–5250 MHz: Indoor use.

5250–5350 MHz: Indoor use: inside buildings only.

5945–6425 MHz: Low Power Indoor use.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This device meets the EU requirements on the limitation of exposure of the general public to electromagnetic fields by way of health protection.

WLAN channel availability varies by country/region.
