

Modular Approval Request FCC (KDB 996369 D01 & Part 15.212)

FCC ID: 2AFG8CPWMU02

<i>Items to be covered by Single modular transmitters.</i>	Answer from applicant
1. The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	Yes, the external photo shows the module has it's owned shielded case.
2. The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	Yes, the radio chipset ESP8684 contains a TX FIFO, which buffers data to be sent and a RX FIFO, which buffers data to be processed.
3. The module must contain power supply regulation on the module	Yes, the chipset ESP8684 contains PMU(power management unit) which built-in digital system voltage regulator and low-power voltage regulator convert the external power supply
4. The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per §§ 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	The module was integrated an U.FL connector for connecting with the external antenna has I-PEX connector.
5.The module must demonstrate compliance in a stand-alone configuration.	Yes, please refer to the test setup photo, the module is demonstrated compliance in a stand-alone configuration.
6.The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (see KDB Publication 784748).	Yes, please refer to the label exhibition folder, the module has it's FCC ID label.
7.The module must comply with all specific rules applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee.	Yes, the module complies with the requirement with 15.247, and the user manual contains all information/ conditions specified in KDB 993369 D03 and D04.
8.The module must comply with RF exposure requirements.	Yes, the module complies with RF exposure with MPE evaluation.
