

小蚁运动相机使用指南英文版

2015-09-18

1.Camera kit

2.Getting to know the camera

- 1 PowerMode button
- 2 Battery LED light
- 3 Lens
- 4 Shutter button
- 5 Status LED light
- 6 Microphone
- 7 Wi-Fi LED light
- 8 Wi-Fi/Bluetooth button

The camera uses Wi-Fi to connect to mobile phones. Once connected, you can remotely control your camera and transfer files between camera and mobile phone.

3.Battery charging

You can charge the camera through USB cable from power adapter or laptop/PC.

4.How to use the camera

- 1) Turn on the camera: Click on the PowerMode button. The LED light will blink few times. Turn off the camera: Press the PowerMode button for 3 seconds. The LED light will blink 7 times.
- 2) Turn on Wi-Fi: Click on the Wi-Fi button. The Wi-Fi LED light will start to blink. Turn off Wi-Fi: Click on the Wi-Fi button again. The Wi-Fi LED light will blink 3 times before turns off.

If using the camera app, you can control the camera remotely from your mobile phone or transfer files from Xiaoyi camera to your mobile phone. It's also possible to control the camera by a Bluetooth remote control (sold separately).

3) Switching camera modes

Click on the PowerMode button quickly to switch between photo and video mode.

Photo:

By default, the camera will always start in photo mode. You can change this configuration on the App.

Video:

Click the PowerMode button again to switch mode to video. Click the Shutter button to start recording. Click the Shutter button again to stop recording.

4) Battery LED Light

Blue - 100%-100% charged
Purple - 10%-49% charged
Red - 0%-14% charged

5) Download the camera app

Scan the following QR Code and download the Xiaoyi Action Camera App to preview videos, record and take pictures through your mobile phone.

Tip: You can also download it at the App Store/Google Play searching for YI Action.

6) Firmware update

Update through the app. Make sure the camera is connected to a power source or has more than 50% battery.

7) Factory settings

If you want to reset your settings to factory defaults, just hold down the Power and Wi-Fi button for two seconds. You will hear a beep when the camera is reset.

8) Attention

Before recording inside a car, remove the camera's battery and plug the camera to a power source through an USB cable.

9) Accessories (Optional)

10) Camera Information

Product Name: YI Action Camera
Lens: F2.8 4K/30 FPS
Focal Length: 2.15x (Wide)
Video Specifications: Support up to 1080P 60FPS
Sensor: Sony IMX181 sensor pixel CMOS
Weight: 72g (Camera + Battery)
Storage: Supports MicroSDXC and MicroSDHC memory card
Typical Power Consumption: 2W

Model: YD04210V
Input Current: 1A
Input Voltage: 5V
Operating Temperature: 0°C~40°C
Operating Humidity: 15~85%RH
Storage Temperature: -20°C~40°C

Manufacturer: Xaoyi Technology co., LTD
Address: 6F, Building E, Changde Square, No.2689 Jinke Road, Pudong, Shanghai, China
Website: www.xiaoyi.com
Tel: +86-021-4165-0722

Thank you for choosing YI Action Camera. Please read this manual carefully and save it for future needs.

The device complies with Part 15 of the FCC Rules. Industry Canada recognizes RSS (Standard). Operation is subject to the following two conditions: (1) the device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industry Canada applicables aux appareils radio exempts de licence. L'utilisateur est autorisé à utiliser l'appareil sous réserve des conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'appareil doit accepter tout brouillage radioélectrique qu'il recevra, y compris le brouillage qui pourrait causer le fonctionnement indésirable de l'appareil.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To avoid potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than the maximum for successful communications.

Conformément de la réglementation d'Industry Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximum (ou inférieur) approuvé pour l'émetteur par Industry Canada. Afin d'éviter les interférences radio à d'autres utilisateurs, le type d'antenne et son gain doivent être choisis de façon que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas la limite maximale autorisée pour les communications réussies.

The device complies with IEC specifications when used near your head or body. This device is also designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (FCC). The SAR limit applied by the USA is 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported to the FCC for this device type complies with the limit. The highest SAR value reported to the FCC for the device type when using all the head is 0.545 W/kg, and when properly worn on the body is 0.026 W/kg.

小蚁蓝牙遥控器使用指南英文版

正面：

YI Yi Bluetooth Remote Control	1. Pairing the Bluetooth Remote Control with Yi Action Camera Press this button twice 1. Power on the Yi Action camera. 2. Press the Wi-Fi button twice in quick succession on the side of the camera. You will hear a short beep and a blue light will appear. 3. The camera now enters into a Bluetooth device pairing state.	Indicator light Shuttle button 4. Press the Shuttle button on the Bluetooth remote control until you hear a short beep. You will see the indicator light turns blinking blue when you successfully paired with the camera. If the indicator light turns red, this indicates the camera has failed paired with the Bluetooth remote control.	2. Take photo/Capture video Mode (photo/video) switch Shutter Button Photo Mode: Press the Shuttle button once to take picture. Video Mode: Press the Shuttle button once to start/stop recording. Reminder: Press the Mode button once to switch betweenphoto made and video mode.	Battery Replacement ① Remove the silicon protective cover by pulling both side away from the unit ② With the backside of the unit facing up Use a small coin to turn the cap the clockwise until the cap pops out. Tips: Use one coin to rotate the cap.
