Cooling Magnetic Wireless Car Charger

User Manual

Thank you for purchasing this product!

This product is a cooling magnetic wireless car charger with built-in cable. It can serve as a vehicle-mounted mobile phone holder and extend the battery life of the phone, allowing you to enjoy the unlimited fun of digital products with ease.

Before using this product, please read this manual carefully and keep it properly for future reference.

List of Accessories

- Wireless car charger × 1
- Air vent bracket × 1
- Nutsert × 1
- Car adapter × 1

Specification

Input: 5V~3A, 9V~3A, 12V~2.92A, 15V~2.33A
Output: 25W MAX
Frequency: 115-205kHz, 360kHz
Charging distance: ≤3mm
Conversion: ≥70%
Size: 66×43×115mm
N.W.: 120g

Installation steps

- Remove the fixing nutsert and insert the outlet bracket into place.
- Push the ball head into the circular hole at the back of the vehicle-mounted bracket. Tighten the screw cap clockwise to secure it properly. Then, you can adjust the vehicle-mounted wireless charger to the desired angle.
- Insert the nozzle clamp of the vehicle-mounted wireless charger into the car nozzle clamp piece to the appropriate position, and then move the fixing lever to fix the wireless charger onto the car nozzle clamp piece.
- Connect the power cord provided with the wireless charger to the car charger head and insert it into the car's cigarette lighter socket.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

* This product also supports charging wireless charging devices that do not have magnetic suction function.

Notes

- Do not squeeze or collisions.
- Do not disassemble or throw into fire or water, to avoid causing a short circuit leakage.
- Do not use wireless charger in severely hot, humid or corrosive environments, to avoid circuit damage and occurs leakage phenomenon.
- Do not place too close with magnetic stripe or chip card (ID card, bank cards, etc.) to avoid magnetic failure.
- Please keep the distance at least 20cm between implantable medical devices (pacemakers, implantable cochlear, etc.) and the wireless chargers, to avoid potential interference with the medical device.
- To take care of the children, to ensure that they won't play the wireless charger as a toy, to avoid unnecessary accidents.
