4 Safety Use Guide

FCC 1g SAR Limit (1.8 W/kg)  
Head: 1.50W/kg (1g)  
Body: 1.20W/kg (1g)  
HAC Test Result: M3/T4

CE 10g SAR Limit (2.0 W/kg)  
Head: 1.20W/kg (10g)  
Body: 0.365W/kg (10g)

Protecting your hearing when using a headset  
To prevent possible hearing damage, do not listen at high volume levels for long periods.

Disposal and recycling information  
Correct Disposal of this product, this marking indicates that this product should not be disposed with other household wastes. To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection system or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

Charger safety  
Charger shall be installed near the equipment and shall be easily accessible. Users have to use the connection to USB interfaces with USB 2.0 version or higher.

Battery safety  
Caution Risk of explosion if battery replaced used by an incorrect type. Dispose of used batteries according to the instructions.

Operating environment  
Please make sure the temperature for charger and device will not be higher than 40°C

5 Declaration of Conformity

RF Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The Highest SAR value for the mobile phone as reported to the FCC when tested for use at the ear is 0.30 W/kg and when worn on the body as described in this user guide, is 1.20W/kg (Body-worn measurements after wearing phone model, depending upon available accessories and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of [www.fcc.gov/oet/efccid](http://www.fcc.gov/oet/efccid) after searching on FCC ID: 2AFWALE1PPO

For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and is positioned the handset a minimum of 1 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1 cm from your body when the phone is switched on.

This device complies with the R&TTE Directive (1999/5/EC), the EMC Directive (2004/108/EC), and the Low Voltage Directive (2006/95/EC) issued by the Commission of the European Community. A minimum separation distance of 1.5 cm must be maintained between the user's body and the device, including the antenna during body-worn operation to comply with the RF exposure requirements in Europe.

Hereby, Letv declares that this GSM/GPRS/EDGE/UMTS/LTE Digital Mobile Phone with Bluetooth and Wi-Fi is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

The device is going on operation in 5150-5350 frequency range. It is restricted indoor environment only.

1. Health (Article 3.1(a) of the R&TTE Directive) (Applied Standards): EN 60666-2013 / AC 2014 EN 60360-2001 + A1:2012 EN 62209-1:2008 / 2:2010 EN 62479-2010 EN 62311-2008

2. Safety (Article 3.1(b) of the R&TTE Directive) (Applied Standards): EN 60950-1:2006+A11:2009+A1:2010+A12:2011+A2:2013 EN 50520-2:2010

3. Electromagnetic compatibility (Article 3.1 (b) of the R&TTE Directive) (Applied Standards): EN 301 488-1 V1.9.2 / 2 V1.6.1 / 2 V1.3.1 / 2 V1.2.1 / 2 V1.5.1

4. Radio frequency spectrum usage (Article 3.2 of the R&TTE Directive) (Applied Standards): EN 300 328 V.9.1 EN 300 440-1 V1.5.1 / 2 V1.4.1 EN 300 900-1 V7.1 / 2 V1.2 V1.2.1 EN 301 511 V1.0.2 EN 301 808-13 V1.2.1 EN 301 893 V1.8.1

This mobile phone complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

The mobile phone has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:  
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all Wi-Fi product marketed in US must feed to US operation channels only.
