4. Safety Use Guide

FCC 1g SAR Limit (1.8 W/kg)

CE 10g SAR Limit (2.0 W/kg)

Head: 1.50 W/kg (1.0g)

Body: 1.20 W/kg (1.0g)

HAC Test Result: M3/T4

5. Declaration of Conformity

This device complies with the R&TTE Directive (1999/5/EC), the EMC Directive (2004/108/EC), and the Low Voltage Directive (2006/95/EC) issued by the Commission of the European Community. A minimum separation distance of 1.5 cm must be maintained between the user's body and the device, including the antenna during body-worn operation to comply with the RF exposure requirements in Europe.

Herby, Letv declares that this GSM/GPRS/EDGE/UMTS/LTE Digital Mobile Phone with Bluetooth and Wi-Fi is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

The device is going on operation in 5150-5350 frequency range. It is restricted indoor environment only.

6. FCC Exposure Information (SAR)

This mobile phone meets the government's requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The Highest SAR value for the mobile phone as reported to the FCC when tested for use at the ear is 0.30 W/kg and when worn on the body as described in this user guide, is 1.20 W/kg (Body-worn measurements after wearing phone model, depending upon available accessories and FCC requirements).

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/efccid after searching on FCC ID: 2AFWALE1PPO.
