

## 7.2. Proper Storing and Disposing of Lithium Batteries

- To minimize risk of fire and explosion of batteries, be sure to follow the instructions below.

| NG | Do not stack batteries                                                             | Do not stack batteries in a vinyl bags                                            | Do not Short circuit                                                              | Do not make forced discharge batteries                                             |                                                                                     |
|----|------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
|    |   |  |  |  |  |
| OK | Using battery tray<br>→ Tape sealing                                               | Tape attachment to "+/- electrodes                                                |                                                                                   |                                                                                    |                                                                                     |
|    |  |  |  |  |  |

- Proper use of battery tray is outlined below.

With batteries properly placed into each tray slot → stack the trays in the same orientation → use an empty tray on the top stack → tape the stack together to avoid falling apart.

| OK | Use the battery tray                                                                | Stack on the tray                                                                   | Seal the tray with tape                                                               |
|----|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|    |  |  |  |
| OK |  |  |  |

- Follow local regulations for proper battery disposal guidelines.
