The FCC ID label exhibit shows two FCC IDs on one enclosure, i.e. 2AFYU26636 and 2AFYU67287.

Is one FCC ID intended to apply to the source/transmitter portion of the "MPBTS," and the other FCC ID for the

amplifier portion? If yes, one of these two Forms-731 probably should be PCB not AMP; please advise which, and modify the Form-731 accordingly.

Or please explain the approval scheme if other or different is intended.

The items indicated above must be submitted before processing can continue on the above referenced application.

Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c).
