Wireless M2M Router iR700B

Delivery Specification

Version 1.4

Systena America, Inc.
1. Scope
   This specification document applies to the wireless M2M router (model name: iR700B series) delivered by IDY Co., Ltd. (Eye-Dee-Why).

2. Overview
   This product is a 4G-WiFi wireless M2M router for business using 4G wireless communications modules such as LTE and WiMAX2+, as well as 3G and PHS wireless communication modules.
   By using mini PCI-Express card slot for the internal interface, it is possible to equip with every type of wireless WAN certified communications module, including 4G LTE, WiMAX2+, 3G HSPA, and PHS.
   The list of available communications modules includes not only full and half-size mini PCI-Express cards, but through the use of a conversion adapter, M.2 (NGFF) standard modules can be installed as well.
   Also, by equipping with RS232/RS485 interface compliant serial data D+/D- terminal, WiFi, and Ethernet, you can connect the router directly to existing equipment.

3. Constitution
   This product will be configured as follows.
   1) iR700B Main Body
   2) Wireless WAN communication module (* 1)
      a. This will be built into Main Body at our factory.
   3) Antenna
      a. Antenna for WiFi x 1
      b. Wireless WAN antenna (* 2)
   4) AC adapter
   5) Rubber foot x 4

   (*1) Wireless WAN communication module can accommodate selection of communication network in accordance with your application.
   Router is compatible with both full and half-size cards.
   The customer must provide the SIM card for the communications module.
   Please contact us to request our recommendation of SIM cards.

   (*2) Depending on communications card, 1 or 2 Wireless WAN antennae may be required.
   The included antennae are certified as a set with the communications module. Please be sure to use with the included antennae.

6. Packaging Specification

6-1. Carton Composition

PACKAGING SPECIFICATION OVERVIEW

- Paper Board: 2 Pcs (435x330x7mm)
- Box Size: 10 Pcs (220x175x65mm)
- Carton Size: 1 Pcs (460x360x230mm)
- Total Weight: 7.6Kg (Ref.)
6-2. SHIPPING MARK

Our company’s standard SHIPPING MARK is stamped on the outer carton. If you have a specific request [for markings], please inform us when placing your order.

FCCID: 2AG2HIR700B-WW
IC: 21068-IR700BW
Contains FCC ID: RI7LN930
Contains IC: 5131A-LN930

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Product S/N:

Ethernet MAC:

WiFi MAC:

7-1. S/N: Serial Number
Serial Numbers are assigned according to the code below.

\[0 B 2 5 0 0 0 0 0 0 0 0 0 0 1\]

- Product Serial Number (000001 - 999999)
- Model Number (00 - 99)
- Factory Number (0 - 9)
- Day of Produced Date (0 - 31)
- Month of Produced Date (A: Oct, B: Nov, C: Dec)
- End Digit of A.D. (0 - 9)

(*1) Model Number: 11 (11 is for iR700B standard model. For customized models, a different number is allocated.)
(*2) Factory ID: Fixed as 0.
7-2. Ethernet MAC: MAC address
   Device is shipped with IDY MAC(1C:06:56:xx:xx:xx).
   If you need a specific MAC address, please provide it when placing your order.

7-3. WiFi MAC: MAC address
   Device is shipped with IDY MAC(1C:06:56:xx:xx:xx).
   If you need a specific MAC address, please provide it when placing your order.

7-3. WiFi Manufacture Design Certification Number
   For this product, it is “208-140077”.

7-4. Manufacture Design Certification Number for Wireless WAN Communications Module
   For type with Wireless WAN Communications Module: Displayed on communications module inside main body
   For type without Wireless WAN Communications Module: No Manufacture Design Certification Number.
8. Shipping Inspection
   Test Environment: Temperature 15～30°C, Humidity 50～80% RH
   Power setting: Voltage 5V±5%, Current limit depends on Communications module (*)
   Product condition: SIM card, WiFi/WWAN Antenna equipped

Federal Communication Commission Interference Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.
Exhibit 3
This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B conforme à la norme NMB-003 du Canada.

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

IMPORTANT NOTE:
IC Radiation Exposure Statement:
This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
